Important information

Please read the *Important information* leaflet before you use your mobile phone.

⚠ Some of the services and features described in this User guide are not supported in all countries/regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number, 112. Please contact your network operator or service provider to determine availability of any specific service or feature and whether additional access or usage fees apply.

Use of certain features and applications described in this guide may require access to the Internet. You may incur data connection charges when you connect to the Internet from your phone. Contact your wireless service provider for more information.
Android™ – what and why?

Your Xperia smartphone from Sony runs on the Android platform. Android phones can perform many of the same functions as a computer and you can customise them to your own needs. For example, you can add and delete applications, or enhance existing applications to improve functionality. On Google Play™ you can download a range of applications and games from a constantly growing collection. You can also integrate applications on your Android™ phone with other applications and with online services that you use. For example, you can back up your phone contacts, access your different email accounts and calendars from one place, keep track of your appointments, and engage in social networking.

Android™ phones are constantly evolving. When a new software version is available and your phone supports this new software, you can update your phone to get new features and the latest improvements.

💡 Your Android™ phone is pre-loaded with Google™ services. To get the most out of the provided Google™ services, you should have a Google™ account and sign in to it when you first start your phone. You also need to have Internet access to use many of the features in Android™.

⚠️ New software releases may not be compatible with all phones.

Applications

An application is a phone program that helps you perform a task. For example, there are applications to make calls, take photos and download more applications.
Getting started

Assembly

To remove the battery cover

- Insert the tip of your finger firmly into the opening on the bottom side of the phone, between the phone and the battery cover. Then lift up the cover slowly but firmly.

! Do not use sharp objects that may damage parts of the phone.

To remove the battery

1. Remove the battery cover.
2. Place the tip of your finger into the opening above the battery, then lift back the battery to remove it.
To insert a memory card

• Remove the battery cover and insert the memory card with the gold-coloured contacts facing down.

To remove the memory card

• Remove the battery cover and the battery, then press against the edge of the memory card and release it. Draw the card outwards to remove it.

To insert the SIM card

! Do not insert an incompatible SIM card in the SIM card slot. Doing so could permanently damage your SIM card or your phone.
- Remove the battery cover, then insert the SIM card into its slot with the gold-coloured contacts facing down.

**To remove the SIM card**

1. Remove the battery cover and the battery.
2. Place the tip of your finger on the SIM card and slide it out of its slot.

**To attach the battery cover**

1. Place the cover over the back of the phone so that the camera lens hole in the cover fits over the camera lens.
2. Press down firmly on all edges of the battery cover to make sure it gets attached tightly.
Turning the phone on and off

To turn on the phone

1 Press and hold down the power key on the right side of the phone until the phone vibrates.
2 If your screen goes dark, press the home key or press the power key briefly to activate the screen.
3 To unlock the screen, drag to the right across the screen.
4 Enter your SIM card PIN when requested, and select OK.

Your SIM card PIN is initially supplied by your network operator, but you can change it later from the Settings menu. To correct a mistake made while entering your SIM card PIN, tap .

It may take a while for the phone to start up.

To turn off the phone

1 Press and hold down the power key until the options menu opens.
2 In the options menu, tap Power off.
3 Tap OK.

It may take a while for the phone to shut down.

Setup guide

The first time you start your phone, a setup guide opens to explain basic phone functions and help you enter essential settings. This is a good time to configure the phone to your specific needs. You can also skip some steps and access the setup guide manually at a later stage.

To access the setup guide manually

1 From the Home screen, tap .
2 Find and tap Setup guide.

Screen lock

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. On the lockscreen, you can still view notifications, for example, notifications of missed calls and messages that arrived since the phone was last locked.

To activate the screen

• Press the home key or press the power key briefly.
To unlock the screen

- Drag ➔ to the right across the screen.

To lock the screen manually

- When the screen is active, briefly press the power key ⏳.

Accounts and services

Sign in to your online service accounts from your phone and benefit from a range of services. Combine services and get even more out of them. For example, collect contacts from your Google™ and Facebook™ accounts and integrate them into your phonebook, so you have everything in one place.

You can sign up to online services from your phone as well as from a computer. When you sign up for the first time, an account is created with your user name, password, settings and personal information. The next time you sign in, you get a personalised view.

Google™ account

Having a Google account is key to using a range of applications and services with your Android phone. You need a Google™ account, for example, to use the Gmail™ application in your phone, to chat with friends using Google Talk™, to synchronise your phone calendar with your Google Calendar™, and to download applications and games, music, movies and books from Google Play™.

Microsoft® Exchange ActiveSync® account

Synchronise your phone with your corporate Microsoft® Exchange ActiveSync® account. This way, you keep your work email, contacts and calendar events with you at all times.

Facebook™ account

Facebook™ is a social networking service that connects you with friends, family and colleagues around the world. Set up Facebook to work on your phone so that you can stay in touch from anywhere.

SyncML™ account

Synchronise your phone with an Internet server using SyncML™. View and manage contacts, calendar events and bookmarks from your phone just as easily as you would from a computer.

- **Search** • Shortcut to Google™ Search

Battery

Charging the battery

Your phone battery is partly charged when you buy the phone. It may take a few minutes before the battery icon appears on the screen when you connect the phone charger cable to a power source, such as a USB port or a phone charger. You can still use your phone while it is charging. Charging the phone over a long period of time, for example, overnight, does not damage the battery or the phone.

⚠ The battery will start to discharge a little after it is fully charged and then charges again after a certain time when the phone charger is connected. This is to extend battery life and may result in the charge status showing a level below 100 percent.

To charge the phone
Plug the phone charger into a power outlet.
Plug one end of the USB cable into the charger (or into the USB port of a computer).
Plug the other end of the cable into the micro USB port on your phone, with the USB symbol facing up. The battery status LED lights up when charging starts.

When the battery status LED is green, the phone is fully charged. Disconnect the USB cable from your phone by pulling it straight outwards.

Make sure not to bend the connector when removing the cable from the phone.

**Battery LED status**

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>The battery is fully charged</td>
</tr>
<tr>
<td>Flashing red</td>
<td>The battery level is low</td>
</tr>
<tr>
<td>Orange</td>
<td>The battery is charging. The battery level is between low and full</td>
</tr>
</tbody>
</table>

**To check the battery level**
1. From your Home screen, tap 📱.
2. Find and tap Settings > About phone > Status > Battery level.

**Improving battery performance**

The following tips can help you improve battery performance:

- Charge your phone often. This will not affect the lifetime of the battery.
- Downloading data from the Internet is power consuming. When you’re not using the Internet, you can save power by disabling all data connections over mobile networks. You can do this from Settings > More... > Mobile networks > Data enabled. This setting does not prevent your phone from transmitting data over other wireless networks.
- Turn off GPS, Bluetooth™ and Wi-Fi® when you don’t need these features. You can turn them on and off more easily by adding the Status switch widget to your Home screen. You do not need to turn off 3G.
- Set your synchronisation applications (used to synchronise your email, calendar and contacts) to synchronise manually. You can also synchronise automatically, but increase the synchronisation intervals.
- Check the battery usage menu in the phone to see which applications use the most power. Your battery consumes more power when you use video and music streaming...
applications, such as YouTube™. Some Google Play™ applications also consume more power.

- Close and exit applications that you are not using.
- Lower the screen display brightness level.
- Turn off your phone or use Airplane mode if you are in an area with no network coverage. Otherwise, your phone repeatedly scans for available networks, and this consumes power.
- Use a Sony original handsfree device to listen to music. Handsfree devices demand less battery power than the phone’s loudspeakers.
- Keep your phone in standby whenever possible. Standby time refers to the time during which the phone is connected to the network and is not being used.
- Go to www.sonymobile.com to get the latest battery performance tips for your phone model.

**To access the battery usage menu**
1. From your Home screen, tap .
2. Find and tap Settings > Battery to see which installed applications consume the most battery power.

**To add the Data traffic widget to your Home screen**
1. From your Home screen, press .
2. Tap Add > Widgets.
3. Select the Data traffic widget. You can now turn on and off your data connection more easily.

**Using the touchscreen**

A protective plastic sheet is attached to the screen of your phone when you buy it. You should peel off this sheet before using the touchscreen. Otherwise, the touchscreen might not function properly.

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. You can also set personal locks to protect your subscription and make sure only you can access your phone content.

Your phone screen is made from glass. Do not touch the screen if the glass is cracked or shattered. Avoid trying to repair a damaged screen yourself. Glass screens are sensitive to drops and mechanical shocks. Cases of negligent care are not covered by the Sony warranty service.

**To open or highlight an item**
- Tap the item.

**To mark or unmark options**
- Tap the relevant checkbox or list option.

<table>
<thead>
<tr>
<th>Marked checkbox</th>
<th>Unmarked checkbox</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marked list option</td>
<td>Unmarked list option</td>
</tr>
</tbody>
</table>

**Zooming**
The zoom options available depend on the application you are using.
To zoom

- When available, tap or to zoom in or out.
  - You may have to drag the screen (in any direction) to make the zoom icons appear.

To zoom with two fingers

- Place two fingers on the screen at once and pinch them together (to zoom out) or spread them apart (to zoom in).
  - Use the zoom function when viewing photos and maps, or when browsing the web.

Scrolling

Scroll by moving your finger up or down on the screen. On some web pages you can also scroll to the sides.

- Dragging or flicking will not activate anything on the screen.

To scroll

- Drag or flick your finger in the direction you want to scroll on the screen.
  - To scroll more quickly, flick your finger in the direction you want to go on the screen.
To flick

• To scroll more quickly, flick your finger in the direction you want to go on the screen. You can wait for the scrolling movement to stop by itself, or you can stop it immediately by tapping the screen.

Sensors

Your phone has sensors that detect both light and proximity. The light sensor detects the ambient light level and adjusts the brightness of the screen accordingly. The proximity sensor turns the touch screen off when your face touches the screen. This prevents you from unintentionally activating phone functions when you are engaged in a call.

Home screen

Your phone Home screen is the equivalent of the desktop on a computer. It’s your gateway to the main features in your phone. You can customise your Home screen with widgets, shortcuts, folders, themes, wallpaper and other items.

The Home screen extends beyond the regular screen display width, so you need to flick left or right to view content in one of the screen’s four extensions. shows which part of the Home screen you are in.

The items in the bar at the bottom of the screen are always available for quick access.

To go to the Home screen
• Press  

To browse the Home screen
• Flick right or left.
To share an item from your Home screen
1 Press ▼ to open your Home screen.
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to ▼.
3 Select an option and confirm, if necessary. You can now share the applications and widgets you like with your friends so they can download and use them.

Widgets
Widgets are small applications that you can use directly on your Home screen. For example, the Music player widget allows you to start playing music directly.

To add a widget to the Home screen
1 From your Home screen, press ▼.
2 Tap Add > Widgets.
3 Tap a widget.

To resize a widget
1 Touch and hold a widget until it magnifies and the phone vibrates, then release the widget. If the widget can be resized, a highlighted frame and resizing dots appear.
2 Drag the dots inward or outward to shrink or expand the widget.
3 To confirm the new size of the widget, tap anywhere on the Home screen.

To get an overview of all widgets on your Home screen
• Pinch on any area of your Home screen. All widgets from different parts of your Home screen are now displayed in one view.
• When all Home screen widgets are combined in one view, tap on any widget to go to the part of the Home screen containing that widget.

Rearranging your Home screen
Customise the appearance of your Home screen and change the features that you can access from it. Change the screen background, move items around, create folders, and add shortcuts to contacts.

To open the options menu of your Home screen
You can open the Home screen options menu in two ways:
• From your Home screen, press ▼.
• Touch and hold on any part of your Home screen.

To add a shortcut to the Home screen
1 From your Home screen, press ▼.
2 Tap Add > Shortcuts.
3 Find and select a shortcut.
• Add an application shortcut directly from the Application screen by touching and holding the application.

To add a folder to the Home screen
1 From your Home screen, press ▼.
2 Tap Add > Folder.
3 Enter a name for the folder and tap Done.
• Drag and drop an item on top of another item on your Home screen to create a folder automatically.

To add items to a folder
• Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the folder.
To rename a folder
1 Tap the folder to open it.
2 Touch the folder's title bar to show the Folder name field.
3 Enter the new folder name and tap Done.

To move an item on the Home screen
1 Press to open your Home screen.
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.

To delete an item from the Home screen
• Touch and hold an item until it magnifies and the phone vibrates, then drag the item to .

Changing the background of your Home screen
Adapt the Home screen to your own style using wallpapers and different themes.

To change your Home screen wallpaper
1 From your Home screen, press .
2 Tap Wallpaper, then select a wallpaper.

Tip: You can use a photo you have taken, or an animation. Go to Android Market™ and other sources to download, for example, live wallpapers that change with the changing hours of the day.

To set a theme
1 From your Home screen, press .
2 Tap Theme, then select a theme.

! When you change a theme, the background also changes in some applications.

Accessing and using applications
Open applications from shortcuts on your Home screen or from the Application screen.

Application screen
The Application screen, which you open from your Home screen, contains the applications that come installed with your phone as well as the applications you download.

The Application screen extends beyond the regular screen width, so you need to flick left and right to view all content.

To open the Application screen
• From your Home screen, tap .

To browse the Application screen
• Open the Application screen, then flick right or left.
To create a shortcut to an application on the Home screen
1. From your Home screen, tap 📌.
2. Touch and hold an application until it appears on your Home screen, then drag it to the desired location.

To share an application from your Application screen
1. From your Home screen, tap 📌.
2. Touch and hold an application until it appears on your Home screen, then drag the item to 📌.
3. Select an option and confirm, if necessary. You can now share the applications you like with your friends so they can download and use them.

Opening and closing applications

To open an application
• From your Home screen or the Application screen, tap the application.

To close an application
• Press 🔒.

Some applications are paused when you press 🔒 to exit, while other applications may continue to run in the background. In the first case, the next time you open the application, you can continue where you left off. Remember that some applications may cause data connection charges when they are running in the background, for example, social networking services.

Recently used applications window
You can view and access recently used applications from this window.

To open the recently used applications window
• Press and hold down 🏡.

Application menu
You can open a menu at any time when you are using an application by pressing the ☰ key on your phone. The menu will look different depending on which application you are using.

To open a menu in an application
• While using the application, press ☰.

A menu is not available in all applications.

Rearranging your Application screen
Move the applications around on the Application screen according to your preferences.

To arrange applications on the Application screen
1. From your Home screen, tap 📌 to go to the Application screen.
2. Tap 🔍 and select an option.
To move an application on the Application screen
1 Open the Application screen, then tap 
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.
3 Tap to exit edit mode.

⚠️ You can only move your applications when is selected.

To uninstall an application from the Application screen
1 From your Home screen, tap .
2 Tap . All uninstallable applications are marked with a icon.
3 Tap the application you want to uninstall, then tap OK.

Status and notifications
The status bar at the top of your screen shows what’s going on in your phone. To the left you get notifications when there is something new or ongoing. For example, new message and calendar notifications appear here. The right side shows the signal strength, battery status, and other information.

Checking notifications and ongoing activities
You can drag down the status bar to open the Notification panel and get more information. For example, you can use the panel to open a new message or view a calendar event. You can also open some applications that run in the background, such as the music player.

To open the Notification panel

• Drag the status bar downwards.
To close the Notification panel

- Drag the tab at the bottom of the Notification panel upwards.

To open a running application from the Notification panel
- Tap the icon for the running application to open it.

To open the phone settings menu from the Notification panel
- Tap ☒.

To dismiss a notification from the Notification panel
- Place your finger on a notification and flick left or right.

To clear all notifications from the Notification panel
- Tap ☒

Phone settings menu
View and change your phone settings from the Settings menu.

To access the phone settings
1. From the Home screen, tap ☒.
2. Tap Settings.

Typing text

On-screen keyboard
Tap the keys of the on-screen QWERTY keyboard to enter text conveniently. Some applications open the on-screen keyboard automatically. You can also open this keyboard by touching a text field.
Using the on-screen keyboard

1 Change the character case and turn on the caps lock. For some languages, this key is used to access extra characters in the language.
2 Close the on-screen keyboard view
3 Display numbers and symbols. Touch and hold to display smileys.
4 Enter a space
5 Open the input settings menu to change, for example, the Writing languages. This key also changes the writing language when more than one input language is selected.
6 Enter a carriage return or confirm text input
7 Delete a character before the cursor

All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To display the on-screen keyboard to enter text
• Tap a text entry field.

To hide the on-screen keyboard
• When the on-screen keyboard is open, press  

To use the on-screen keyboard in landscape orientation
• When you enter text, turn the phone sideways.

For the keyboard to support this feature, landscape mode must be supported by the application you are using, and your screen orientation settings must be set to automatic.

To enter text using the on-screen keyboard
1 To enter a character visible on the keyboard, tap the character.
2 To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é", touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é".

To shift between upper-case and lower-case letters
• Before you enter a letter, tap  to switch to upper-case  or vice versa.

To turn on the caps lock
• Before you type a word, tap  or  until  appears.

To enter numbers or symbols
• When you enter text, tap . A keyboard with numbers and symbols appears. Tap  to view more options.
To enter common punctuation marks
1 When you finish entering a word, tap the space bar.
2 Select a punctuation mark from the candidate bar. The selected mark is inserted before the space.

- To quickly enter a full stop, tap the space bar twice when you finish entering a word.

To insert a smiley
1 When you enter text, touch and hold 🎈.
2 Select a smiley.

To delete characters
• Tap to place the cursor after the character you want to delete, then tap 🗑.

To enter a carriage return
• When you enter text, tap 🎁 to enter a carriage return.

To select text
1 When you enter text, touch and hold the text field or double-tap within the text field.
2 The word you touch gets highlighted by tabs on both sides. Drag the tabs left or right to select more text.

To edit text in portrait orientation
1 When you enter text, touch and hold the text field until an application bar appears.
2 Select the text you want to edit, and then use the application bar to make your desired changes.

! To paste text from the clipboard, you can also hold the text field until Paste appears, then tap Paste.

Application bar

1 Close the application bar
2 Select all text
3 Cut text
4 Copy text
5 Paste text

! only appears when you have text stored on the clipboard.

Using the Gesture input function to write words
You can input text by sliding your finger from letter to letter on the on-screen keyboard. You can lift your finger between words so that the phone recognises them.

! Gesture input is only available when you use the on-screen keyboard.
To change the Gesture input settings
1 When you enter text using the on-screen keyboard, tap . If you have selected more than one writing language, touch and hold .
2 Tap Text input settings.
3 Mark or unmark the Gesture input checkbox.
4 If you want to automatically add a space between gestures without having to tap the space bar each time, mark the Space between gestures checkbox.

To enter text using the Gesture input function
1 When you enter text using the on-screen keyboard, slide your finger from letter to letter to trace the word you want to write. Lift up your finger when you’ve finished entering a word.
2 The phone suggests a word based on the letters you have traced. If necessary, select the correct word in the candidate bar. To view more options, scroll right or left in the word candidate bar. If you cannot find the desired word, tap once to delete the entire word. Then try again to trace the word using Gesture input, or tap each letter to enter the word.
3 If the Space between gestures setting is activated, trace the next word that you want to enter. If not, tap the space bar and then trace the next word you want to enter.

To enter joined compound words when the Space between gestures setting is activated, you may need to slide to enter the first part of the word, then tap each letter to enter the rest of the word.

Phonepad
The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation.

Using the Phonepad

1 Choose a text input option
2 Change the character case and turn on the caps lock
3 Display numbers
4 Display symbols and smileys
5 Enter a space
6 Open the input settings menu to change, for example, the Writing languages. This key also changes the writing language when more than one input language is selected.
7 Enter a carriage return or confirm text input
All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To open the Phonepad for the first time

• Tap a text entry field, then tap or touch and hold if you have already selected more than one input language. Tap Portrait keyboard and select an option.

Once you’ve made the setting, you can simply activate the Phonepad by tapping a text entry field.

To switch between the on-screen keyboard and the Phonepad

1. When you enter text, tap or touch and hold if you have already selected more than one input language.
2. Tap Portrait keyboard and select an option.

Remember the Phonepad is only available in portrait orientation.

To enter text using the Phonepad

• When appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap to view more word suggestions and select a word from the list.

• When appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep pressing this key until the desired character is selected. Then do the same for the next character you want to enter, and so on.

To enter numbers using the Phonepad

• When the Phonepad is open, tap. A Phonepad with numbers appears.

To insert symbols and smileys using the Phonepad

1. When the Phonepad is open, tap. A grid with symbols and smileys appears.
2. Scroll up or down to view more options. Tap a symbol or smiley to select it.

Keyboard and Phonepad settings

You can select settings for the on-screen keyboard and the Phonepad, such as writing language and automatic correction.

To access the keyboard and the Phonepad settings

• When you enter text using the on-screen keyboard or Phonepad, tap. If you have selected more than one writing language, touch and hold instead.

To change writing language using the on-screen keyboard or the Phonepad

1. When you enter text, tap, or touch and hold if you have already selected more than one input language.
2. Tap Writing languages and select the languages you want to use for writing.
3. If you have selected more than one input language, tap to switch between the selected writing languages.

To switch keyboards

1. When you enter text, drag the status bar downwards to open the Notification panel.
2. Tap Select input method, and select an option.
Text input settings
When entering text, you can access a text input settings menu that helps you set options for text prediction. For example, you can decide how you want the phone to present word alternatives and correct words as you type, or enable the text input application to remember new words you write.

To change the text input settings
1 When you enter text using the on-screen keyboard or the Phonepad, tap 🖱️ or touch and hold ✂️.
2 Tap Text input settings.
3 Select the desired settings.

Customising your phone
Adapt the phone to your needs by adjusting, for example, your personal ringtone, phone language and your Privacy settings.

Adjusting the volume
You can adjust the ringtone volume for phone calls and notifications as well as for music and video playback.

To adjust the ring volume with the volume key
• Press the volume key up or down.

To adjust the media playing volume with the volume key
• When playing music or watching video, press the volume key up or down.

To set the phone to silent mode
1 From your Home screen, tap 🔔.
2 Find and tap Settings > Sound.
3 Select Silent mode, then select Mute.

To set the phone to vibrate mode
1 From your Home screen, tap 🔔.
2 Find and tap Settings > Sound.
3 Select Silent mode, then select Vibrate.

To set the phone to vibrate and ring mode
1 From your Home screen, tap 🔔.
2 Find and tap Settings > Sound.
3 Select Silent mode, then select Off.
4 Mark the Vibrate on ring checkbox.

To enhance the speaker loudness
1 From your Home screen, tap 🔔.
2 Find and tap Settings > Sound.
3 Mark the xLOUD™ checkbox.

Time and date
You can change the time and date in your phone.
To set the date manually
1 From your Home screen, tap 📅.
2 Find and tap Settings > Date & time.
3 Unmark the Automatic date & time checkbox, if it is marked.
4 Tap Set date.
5 Adjust the date by scrolling up and down.
6 Tap Set.

To set the time manually
1 From your Home screen, tap 📅.
2 Find and tap Settings > Date & time.
3 Unmark the Automatic date & time checkbox if it is marked.
4 Tap Set time.
5 Scroll up or down to adjust the hour and minute.
6 If applicable, scroll up to change AM to PM, or vice versa.
7 Tap Set.

To set the time zone
1 From your Home screen, tap 📅.
2 Find and tap Settings > Date & time.
3 Unmark the Automatic time zone checkbox, if it is marked.
4 Tap Select time zone.
5 Select an option.

To set the date format
1 From your Home screen, tap 📅.
2 Find and tap Settings > Date & time > Select date format.
3 Select an option.

Ringtone settings

To set a phone ringtone
1 From your Home screen, tap 📅.
2 Find and tap Settings > Sound > Phone ringtone.
3 Select a ringtone.
4 Tap Done.

To enable touch tones
1 From your Home screen, tap 📅.
2 Find and tap Settings > Sound.
3 Mark the Dial pad touch tones and Touch sounds checkboxes.

To select a notification ringtone
1 From your Home screen, tap 📅.
2 Find and tap Settings > Sound > Default notification.
3 Select a ringtone.
4 Tap Done.

Screen settings

To adjust the screen brightness
1 From your Home screen, tap 📅.
2 Find and tap Settings > Display > Brightness.
3 To decrease the screen brightness, drag the slider to the left. To increase it, drag the slider to the right.
4 Tap OK.

💡 The brightness level affects your battery performance. For tips on how to improve battery performance, see Improving battery performance on page 15.
To set the screen to vibrate
1. From your Home screen, tap.
2. Find and tap Settings > Sound.
3. Mark the Vibrate on touch checkbox. The screen now vibrates when you tap soft keys and certain applications.

To adjust the idle time before the screen turns off
1. From your Home screen, tap.
2. Find and tap Settings > Display > Sleep.
3. Select an option.

- To turn off the screen quickly, briefly press the power key 🕹️.

To keep the screen active while the phone is charging
1. From the Home screen, tap.
2. Find and tap Settings > Developer options.
3. Mark the Stay awake checkbox.

Phone language
You can select a language to use in your phone.

To change the phone language
1. From your Home screen, tap.
2. Find and tap Settings > Language & input > Language.
3. Select an option.

- If you select the wrong language and cannot read the menu texts, find and tap the Settings icon 📜. Then select the entry beside 📜, and select the first entry in the following menu. You can then select the language you want.

Airplane mode
In Airplane mode, your phone’s network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated.

- Turning on Airplane mode reduces battery consumption.

To turn on Airplane mode
1. From your Home screen, tap.
2. Find and tap Settings > More....
3. Mark the Airplane mode checkbox.

- You can also select Airplane mode from the Phone options menu. To access the Phone options menu, press and hold down the power key 🕹️.

Memory
You can save content on a memory card and in the phone memory. Music, video clips and photos are saved on the memory card while applications, contacts and messages are saved in the phone memory.

- You can move some applications from the phone memory to the memory card.
To move an application to the memory card

1. From your Home screen, tap 📱.
2. Find and tap Settings > Apps.
3. Tap the desired application.
4. Tap Move to SD card.

⚠️ It is not possible to move some applications from the phone memory to the memory card.

Memory card

Your phone is preloaded with a microSD™ memory card, which is used for media content. This type of card can also be used as a portable memory card with other compatible devices.

Formatting the memory card

You can format the memory card in your phone, for example, to free up memory. This means that you erase all data on the card.

⚠️ All content on the memory card gets erased when you format it. Make sure you make backups of everything you want to save before formatting the memory card. To back up your content, you can copy it to your computer. For more information, refer to the chapter Connecting your phone to a computer on page 100.

To format the memory card

1. From your Home screen, tap 📱.
2. Find and tap Settings > Storage >Unmount SD card.
3. After you have unmounted the memory card, tap Erase SD card.

Using a headset with your phone

![Headset connected to phone]

⚠️ Use the accessories provided with your phone, or other compatible accessories, for optimal performance.

To use a headset

1. Connect the headset to your phone.
2. To answer a call, press the call handling key.
3. To end the call, press the call handling key.

⚠️ If a headset is not included with the phone, you may purchase one separately.

⚠️ If you are listening to music, the music stops when you answer a call and resumes after you end the call.

Internet and messaging settings

To send text and multimedia messages and to access the Internet, you must have a 2G/3G mobile data connection and the correct settings. There are different ways to get these settings:
• For most mobile phone networks and operators, Internet and messaging settings come preinstalled on your phone. You can then start using the Internet and send messages right away.

• In some cases you will get the option to download Internet and messaging settings the first time you turn on your phone. It is also possible to download these settings later from the Settings menu.

• You can manually add and change Internet and network settings in your phone at any time. Contact your network operator for detailed information on your Internet and messaging settings.

To download Internet and messaging settings
1. From your Home screen, tap ☰.
2. Find and tap Settings > Xperia™ > Internet settings.

To view the current Access Point Name (APN)
1. From the Home screen, tap ☰.
2. Find and tap Settings > More… > Mobile networks.
3. Tap Access Point Names.

! If you have several available connections, the active network connection will be indicated by a marked button to the right.

To configure APN settings manually
1. From the Home screen, tap ☰.
2. Find and tap Settings > More… > Mobile networks > Access Point Names.
3. Press ☰.
4. Tap New APN.
5. Tap Name and enter the name of the network profile you want to create.
6. Tap APN and enter the access point name.
7. Enter all other information required by your network operator.
8. Press ☰ and tap Save ☰.

! Contact your network operator for detailed information about your network settings.

To reset the default Internet settings
1. From the Home screen, tap ☰.
3. Press ☰.
4. Tap Reset to default.

Usage info
For quality purposes, Sony collects anonymous bug reports and statistics regarding your phone usage. None of the information gathered includes personal data. By default, the usage info sending option is not activated. But you can choose to activate it if you like.

To send usage info
1. From your Home screen, tap ☰.
2. Find and tap Settings > Xperia™ > Usage info settings.
3. Mark the Send usage info checkbox.

Turning off data traffic
You can disable all data connections over 2G/3G networks with your phone to avoid any unwanted data downloads and synchronisations. Contact your network operator if you need detailed information about your subscription plan and data traffic costs.

💡 When data traffic is turned off, you can still use Wi-Fi® and Bluetooth™ connections. You can also send and receive multimedia messages.
To turn off all data traffic

1. From your Home screen, tap ☰.
2. Find and tap Settings > More… > Mobile networks.
3. Unmark the Data enabled checkbox.

Data roaming

Depending on your network operator, it might be possible to allow mobile data connections via 2G/3G outside of your home network (roaming). Please note that data transmission charges may apply. Contact your network operator for more information.

⚠ Applications may sometimes use the Internet connection in your home network without any notification, for example, when sending search and synchronisation requests. Additional charges may apply for data roaming. Consult your service provider.

To activate data roaming

1. From the Home screen, tap ☰.
2. Find and tap Settings > More… > Mobile networks.
3. Mark the Data roaming checkbox.

⚠ You can’t activate data roaming when data connections have been deactivated

Network settings

Your phone automatically switches between networks depending on available networks over different locations. Initially, your phone is configured to use the fastest mobile network mode available for data. But you can configure your phone manually to use only a slower 2G network mode for data, to extend the life of your battery between charges. You can also configure your phone to access a different set of network modes entirely, or to behave in special ways when roaming.

To select a network mode

1. From your Home screen, tap ☰.
2. Find and tap Settings > More… > Mobile networks.
3. Tap Network Mode.
4. Select a network mode.

To select another network manually

1. From the Home screen, tap ☰.
2. Find and tap Settings > More… > Mobile networks > Network operators.
3. Tap Search mode.
5. Select a network.

⚠ If you select a network manually, your phone will not search for other networks, even if you move out of range of the manually selected network.

To activate automatic network selection

1. From the Home screen, tap ☰.
2. Find and tap Settings > More… > Mobile networks > Network operators.
3. Tap Search mode.
4. Tap Automatic.
Calling

Emergency calls
Your phone supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted, if you are within range of a network.

To make an emergency call
1 From your Home screen, tap 📞.
2 Find and Tap Phone.
3 Enter the emergency number and tap Call. To delete a number, tap 📧.

💡 You can make emergency calls when no SIM card is inserted or when outgoing calls are barred.

To make an emergency call while the SIM card is locked
1 Tap Emergency call.
2 Enter the emergency number and tap Call. To delete a number, tap 📧.

Call handling
You can make a call by manually dialling a phone number, by tapping a number saved in your phone’s contact list, or by tapping the phone number in your call log view. You can also use the smart dial feature to quickly find numbers from your contact list and call logs.

To make a call by dialling
1 From your Home screen, tap 📞.
2 Find and tap Phone.
3 Enter the number of the recipient and tap Call. To delete a number, tap 📧.

To make a call using smart dial
1 From your Home screen, tap 📞.
2 Find and tap Phone.
3 Use the dialpad to enter letters or numbers that correspond to the contact you want to call. As you enter each letter or number, a list of possible matches appears.
4 Tap the contact you want to call.

To end a call
• Tap 📞

To make an international call
1 From your Home screen, tap 📞.
2 Find and tap Phone.
3 Touch and hold 0 until a “+” sign appears.
4 Enter the country code, area code (without the first 0) and phone number, then tap Call.
To answer a call

- Drag 🔄 to the right across the screen.

⚠️ If you are using regular headphones without a microphone, you have to remove the headphones from the headset connector to be able to answer the call.

To decline a call

- Drag 🚪 to the left across the screen.

To reject a second call

- When you hear repeated beeps during a call, tap Busy.

To change the ear speaker volume during a call

- Press the volume key up or down.

To turn on the loudspeaker during a call

- Tap 🔊.

To mute the microphone during a call

- Tap 🎤.

To activate the screen during a call

- Press 📱.

To enter numbers during a call

1. During a call, tap 📱. A keypad appears.
2. Enter numbers.

To mute the ringtone for an incoming call

- When you receive the call, press the volume key.

Recent calls

In the call log, you can view recently missed 🔄, received 📸 and dialled 📷 calls.

To view your missed calls

1. When you have missed a call, 🔴 appears in the status bar. Drag the status bar downwards.
2. Tap Missed call.

To call a number from your call log

1. From your Home screen, tap 📱.
2. Find and tap Phone. The call log view appears on the upper part of the screen.
3. To call a number directly, tap the number. To edit a number before calling, touch and hold the number, then tap Edit number before call.

⚠️ You can also call a number by tapping 📱 > Call back.

To add a number from the call log to your contacts

1. From your Home screen, tap 📱.
2. Find and tap Phone. The call log view appears on the upper part of the screen.
3. Touch and hold the number, then tap Add to Contacts.
4. Tap the desired contact, or tap Create new contact.
5. Edit the contact details and tap Done.
Voicemail

If your subscription includes a voicemail service, callers can leave voice messages for you when you can’t answer calls. Your voicemail service number is normally saved on your SIM card. If not, you can get the number from your service provider and enter it manually.

To enter your voicemail number
1 From the Home screen, tap 📞.
2 Find and tap Settings > Call settings > Voicemail settings > Voicemail number.
3 Enter your voicemail number.
4 Tap OK.

To call your voicemail service
1 From your Home screen, tap 📞.
2 Find and tap Phone.
3 Touch and hold 1.

Multiple calls

If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

To activate or deactivate call waiting
1 From the Home screen, tap 📞.
2 Find and tap Settings > Call settings > Additional settings.
3 To activate or deactivate call waiting, tap Call waiting.

To answer a second call and end the ongoing call
• When you hear repeated beeps during a call, tap End current call and answer.

To answer a second call and put the ongoing call on hold
• When you hear repeated beeps during a call, tap Answer.

To make a second call
1 During an ongoing call, tap 📞.
2 Enter the number of the recipient and tap ✆.
3 If the recipient answers, the first call is put on hold.

💡 The same procedure applies to subsequent calls.

To switch between multiple calls
• To switch to another call and put the current call on hold, tap the desired number or contact.

To end the ongoing call and return to the next call on hold
• Tap ✆.

Conference calls

With a conference or multiparty call, you can have a joint conversation with two or more persons.
To make a conference call
1 During an ongoing call, tap 📞.
2 Dial the number of your second participant and tap 📞.
3 If the second participant answers, the first call is put on hold.
4 Tap 📞.

To add more participants, repeat steps 1 to 4.

To have a private conversation with a conference call participant
1 During an ongoing conference call, tap the button showing the number of participants. For example, tap 3 participants if there are three participants on the call.
2 Tap the name of the participant you want to talk to privately.
3 To end the private conversation and return to the conference call, tap 📞.

To release a participant from a conference call
1 During an ongoing conference call, tap the button showing the number of participants. For example, tap 3 participants if there are three participants.
2 Tap 📞 next to the participant you want to release.

To end a conference call
• During the call, tap 📞.

Call settings

Barring calls
You can bar all or certain categories of incoming and outgoing calls. When you use call barring for the first time, you need to enter your PUK (Personal Unblocking Key) and then a new password to activate the call barring function.

To bar incoming or outgoing calls
1 From your Home screen, tap 📞.
2 Find and tap Settings > Call settings > Call barring.
3 Select an option.
4 Enter the password and tap Enable.

Rejecting a call with a message
You can reject a call with a predefined message. When you reject a call with such a message, the message is automatically sent to the caller and saved on your phone.

Six messages are predefined in the phone. You can select from these predefined messages, which can also be edited if necessary.

To reject a call with a predefined message
• Drag Reject with message upward, then select a message.

To reject a second call with a message
• When you hear repeated beeps during a call, drag Reject with message upward, then select a message.

To edit the message used to reject a call
1 From your Home screen, tap 📞.
2 Find and tap Settings > Call settings > Reject call with message.
3 Tap the message you want to edit, then make the necessary changes.
4 When you’re done, tap OK.
Forwarding calls
You can forward calls, for example, to another phone number, or to an answering service.

To forward calls
1 From your Home screen, tap .
2 Find and tap Settings > Call settings > Call forwarding.
3 Select an option.
4 Enter the number you want to forward the calls to, then tap Enable.

To turn off call forwarding
1 From your Home screen, tap.
2 Find and tap Settings > Call settings > Call forwarding.
3 Select an option, then tap Disable.

Showing or hiding your phone number
You can select to show or hide your phone number on call recipients' devices when you call them.

To show or hide your phone number
1 From your Home screen, tap.
2 Find and tap Settings > Call settings > Additional settings > Caller ID.

Fixed Dialling Numbers
If you have received a PIN2 code from your service provider, you can use a list of Fixed Dialling Numbers (FDN) to restrict outgoing calls.

To enable or disable fixed dialling
1 From your Home screen, tap.
2 Find and tap Settings > Call settings > Fixed dialling numbers.
3 Tap Activate fixed dialling or Deactivate fixed dialling.
4 Enter your PIN2 and tap OK.

To access the list of accepted call recipients
1 From your Home screen, tap.
2 Find and tap Settings > Call settings > Fixed dialling numbers > Fixed dialling numbers.
Contacts

Use the Contacts application to store and manage all your numbers, email addresses, and other contact data in one place. Just tap on a contact to see all communications with that contact in one easy overview.

You can add new contacts in your phone and synchronise them with contacts saved in your Google™ account, Microsoft® Exchange ActiveSync® account, or other accounts that support synchronisation. The Contacts application automatically creates new entries and also helps you match data such as email addresses with existing entries. You can also manage this process manually. For more information, go to www.sonymobile.com.

Transferring contacts to your new phone

There are several ways to transfer contacts to your new phone. Select a transfer method that best suits your situation.

Transferring contacts using a PC

You can use a PC to transfer contacts from several phone brands, including iPhone, Samsung, HTC and Nokia.

You need:
- An Internet-connected PC running Windows®
- A USB cable for your old phone
- A USB cable for your new Android™ phone
- Your old phone
- Your new Android™ phone

If you don’t have access to all of the items listed above, go to www.sonymobile.com to find out about other ways to transfer your contacts.

Using the PC Companion program to transfer contacts

If you are transferring contacts using a PC, use the PC Companion program. It’s free, and the installation files are already saved on your new phone. PC Companion also offers a range of other features, including help to update your phone software.

To install PC Companion

1 New phone: Turn on your new Android™ phone and connect it to a PC using a USB cable.
2 New phone: Tap Install to install PC Companion on the PC.
3 Computer: If a popup window appears, select Run Startme.exe. In the new popup window that appears, click Install to start the installation and then follow the instructions to complete the installation.

To transfer contacts to your new phone using PC Companion

1 Make sure that PC Companion is installed on your PC.
2 Open the PC Companion program on the PC, then click Contacts Setup and follow the instructions to transfer your contacts.
Transferring contacts using an Apple® Mac® computer

For detailed instructions on how to use an Apple Mac computer to transfer contacts from your old phone, go to www.sonymobile.com.

Transferring contacts using synchronisation accounts

Your phone works with popular online synchronisation accounts such as Google Sync™, Microsoft® Exchange ActiveSync® or Facebook™. If you have synced the contacts in your old phone or your computer with an online account, you can transfer your contacts to your new phone using that account. For more detailed information about synchronisation, see Synchronising data on your phone on page 67.

To synchronise your phone contacts with a synchronisation account

1. From your Home screen, tap 
2. Press , then tap Settings > Accounts & sync.
3. To set up a synchronisation account, tap Add account and follow the on-screen instructions. If you have already set up a synchronisation account and you want to sync with that account, tap the account, press , and tap Sync now.

To import contacts from a SIM card

1. From your Home screen, tap , then tap .
2. Press , then tap Import contacts > SIM card.
3. If you have set up a synchronisation account, you can choose to add the SIM card contacts under that account. Or you can choose to only use these contacts in the phone. Select your desired option.
4. To import an individual contact, find and tap the contact. To import all contacts, press , then tap Import all.

To import contacts from a memory card

1. From your Home screen, tap , then tap .
2. Press , then tap Import contacts > SD card.
3. If you have set up a synchronisation account, you can add the imported memory card contacts under that account. Or you can choose to only use the imported contacts in the phone. Select your desired option.
4. If you have more than one vCard file on the SD card, a list appears showing different batches of phone contacts, with the corresponding dates for when they were created. Select the batch you want to import.

To receive contact data sent using Bluetooth™ technology

1. Make sure you have the Bluetooth™ function turned on and your phone set to visible. If not, then you cannot receive data from other devices.
2. When you are asked to confirm whether you want to receive the file, tap Accept.
3. Drag down the Notification panel and tap the file you received to import the contact data.

To receive contacts sent using a messaging service

1. When you receive a new text message, multimedia message, or email message, open the message.
2. The received contact data appears as a vCard attachment. Tap, or touch and hold the vCard file to open a menu so you can save the contact data.
Contacts screen overview

1 Tap here to create a contact
2 Contact search field
3 Touch a contact to view its details
4 Alphabetical index for browsing contacts
5 Tap a contact thumbnail to access the Quick Contact menu
6 Shortcut tabs

Managing your contacts

You can create, edit and synchronise your contacts in a few simple steps. You can select contacts saved in different accounts and manage how you display them in the phone.

If you synchronise your contacts with more than one account, you can join contacts in your phone to avoid duplicates.

⚠️ Some synchronisation services, for example, some social networking services, do not allow you to edit contact details.

To view your contacts
• From your Home screen, tap 📞, then tap 📞. Your contacts are listed here.

To select which contacts to display in the Contacts application
1 From your Home screen, tap 📞, then tap 📞.
2 Press ☰, then tap Filter.
3 In the list that appears, mark and unmark the desired options. If you have synchronised your contacts with a synchronisation account, that account appears in the list. You can tap the account to further expand the list of options. When you are finished, tap OK.

To add a contact
1 From your Home screen, tap 📞, then tap 📞.
2 Tap 📞.
3 If you have synchronised your contacts with one or more accounts, select the account to which you want to add this contact, or tap Phone contact if you only want to use this contact in your phone.
4 Enter or select the desired information for the contact.
5 When you are finished, tap Done.

💡 If you add a plus sign and the country code before a contact phone number, you can use the number when you make calls from other countries.
To edit a contact
1. From the Home screen, tap , then tap .
2. Touch and hold the contact you want to edit, then tap Edit contact.
3. Edit the desired information. When you are finished, tap Done.

To associate a picture with a contact
1. From your Home screen, tap , then tap .
2. Touch and hold the contact you want to edit, then tap Edit contact.
3. Tap and select the desired method for adding the contact picture.
4. When you have added the picture, tap Done.

- You can also add a picture to a contact directly from the Xperia™ Gallery application.

To view your communication with a contact
1. From the Home screen, tap , then tap .
2. Tap the contact you want to view.
3. To view your communication with the contact for different media, tap or flick through the filter items at the bottom of the screen.

To delete contacts
1. From your Home screen, tap , then tap .
2. Press , then tap Delete contacts.
3. Mark the contacts you want to delete, or tap Mark all if you want to delete all contacts.
4. Tap Delete > OK.

To edit contact information about yourself
1. From your Home screen, tap , then tap .
2. Touch and hold Myself at the top of the contact list, then tap Edit contact.
3. Enter the new information or make the changes you want.
4. When you are done, tap Done.

Avoiding duplicate entries in the Contacts application
If you synchronise your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

To link contacts
1. From your Home screen, tap , then tap .
2. Touch and hold the contact you want to link with another contact, then tap Link contact.
3. From the list that appears, tap the contact whose information you want to join with the first contact, then tap OK to confirm. The information from the first contact is merged with the second contact, and the first contact is no longer displayed in the Contacts list.

To separate linked contacts
1. From your Home screen, tap , then tap .
2. Touch and hold the linked contact you want to edit, then tap Edit contact.
3. Tap Unlink contact.
4. Tap OK.

Groups
You can assign contacts to groups to get quicker access to them from within the Contacts application.
To assign a contact to a group
1. From the Home screen, tap , then tap .
2. Touch and hold the contact that you want to assign to a group, then tap Edit contact.
3. Tap the bar directly under Assign to group.
4. Mark the checkboxes for the groups to which you want to add the contact, then tap Done.

Favourites
You can mark contacts as favourites so that you can get quick access to them from the Contacts application.

To mark or unmark a contact as a favourite
1. From the Home screen, tap , then tap .
2. Tap the contact you want to add to or remove from your favourites.
3. Tap .

To view your favourite contacts
1. From your Home screen, tap , then tap .
2. Tap Groups, then tap .

Communicating with your contacts

To search for a contact
1. From your Home screen, tap , then tap .
2. Enter the first few letters of the contact name in the Search field. All contacts beginning with those letters appear.

The quick contact menu
Tap a contact's thumbnail to view quick communication options for a particular contact. Options include calling the contact, sending a text or multimedia message, and starting a chat using the Google Talk™ application.

! For an application to appear as an option in the quick contact menu, you may need to set up the application in your phone and be logged in to the application. For example, you need to start the Gmail™ application and enter your login details before you can use Gmail™ from the quick contact menu.

Sharing your contacts

To send your business card
1. From your Home screen, tap , then tap .
2. Tap Myself.
3. Press , then tap Send contact > OK.
4. Select an available transfer method and follow the on-screen instructions.

To send a contact
1. From your Home screen, tap , then tap .
2. Tap the contact whose details you want to send.
3. Press , then tap Send contact > OK.
4. Select an available transfer method and follow the on-screen instructions.
To send several contacts at once
1. From your Home screen, tap  
2. Press  
3. Mark the contacts you want to send, or select all if you want to send all contacts.
4. Tap Send, then tap OK to confirm.
5. Select an available transfer method and follow the on-screen instructions.

Backing up contacts
You can use a memory card, a SIM card or an online synchronisation tool such as Microsoft® Exchange ActiveSync® to back up contacts.

To export all contacts to the memory card
1. From your Home screen, tap  
2. Press  
3. Tap OK.

To export contacts to a SIM card
1. From your Home screen, tap  
2. Press  
3. Mark the contacts you want to export, or tap Mark all if you want to export all your contacts.
4. Tap Back up.
5. Select Add contacts if you want to add the contacts to existing contacts on your SIM card, or select Replace all contacts if you want to replace the existing contacts on your SIM card.

When you export contacts to a SIM card, not all information may get exported. This is due to memory limitations on SIM cards.
Messaging

Using text and multimedia messaging
You can send and receive text messages from your phone using SMS (Short Message Service). If your subscription includes MMS (Multimedia Messaging Service), you can also send and receive messages that contain media files, for example, pictures and videos. The number of characters you can send in a single text message varies depending on the operator and the language you use. If you exceed the character limit, then all your single messages are linked together and sent as one message. You are charged for each single text message you send. When you view your messages, they appear as conversations, which means that all messages to and from a particular person are grouped together.

To send multimedia messages, you need the correct MMS settings in your phone. See Internet and messaging settings on page 31.

To create and send a message
1. From your Home screen, tap Messaging, then find and tap New message.
2. Tap New message.
3. To add a recipient, tap Add recipient, then find and mark the checkbox next to the recipient name. To add more than one recipient, mark the checkboxes for the desired recipients. You can also enter the full number in the search field manually, then tap Add.
4. When you are finished adding recipients, tap Done.
5. Tap Write message and enter your message text.
6. If you want to add a media file, tap and select an option.
7. If you want to add or remove recipients before sending the message, press . To add a recipient, tap Add recipient. To remove a recipient, tap Edit recipients and tap X next to a recipient field. When you are finished, tap Done.
8. To send the message, tap Send.

If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word Draft:

To read a received message
1. From your Home screen, tap Messaging, then find and tap Messaging.
2. Tap the desired conversation.
3. If the message is not yet downloaded, tap and hold the message, then tap Download message.

When you receive a text or multimedia message, X appears in the status bar. To read the message, you can also drag the status bar downwards and tap the received message when the status bar is open.

To reply to a message
1. From your Home screen, tap Messaging, then tap Messaging.
2. Tap the desired conversation.
3. Enter your reply and tap Send.

To forward a message
1. From your Home screen, tap Messaging, then tap Messaging.
2. Tap the desired conversation.
3. Touch and hold the message you want to forward, then tap Forward message.
4. Select a recipient from the list, or tap Add recipient to add a recipient who is not in the list.
5. Edit the message and tap Send.
To delete a message
1  From your Home screen, tap , then tap Messaging.
2  Tap the desired conversation.
3  Touch and hold the message you want to delete, then tap Delete message > Yes.

To delete conversations
1  From your Home screen, tap , then tap Messaging.
2  Press , then tap Delete several.
3  Mark the checkboxes for the conversations you want to delete, then tap Delete.

To save a sender’s number to a contact
1  From your Home screen, tap , then tap Messaging.
2  Tap a conversation.
3  Tap the sender’s number at the top of the screen.
4  Tap .
5  Select an existing contact, or tap if you want to create a new contact.
6  Edit the contact information and tap Done.

To call a message sender
1  From your Home screen, tap , then tap Messaging.
2  Tap a conversation.
3  Tap the recipient name or number at the top of the screen.
4  If the recipient is saved in your contacts, tap the phone number you want to call. If you have not saved the recipient in your contacts, tap .

To save a file contained in a message you receive
1  From your Home screen, tap , then tap Messaging.
2  Tap the desired conversation.
3  If the message has not been downloaded yet, tap and hold the message, then tap Download message.
4  Touch and hold the file you want to save, then select the desired option.

Text and multimedia message options

To change the notification settings for messages
1  From your Home screen, tap , then tap Messaging.
2  Press , then tap Settings.
3  If desired, tap Notification tone and select a notification sound.
4  If desired, tap Notification vibration and mark the checkbox to activate.

To change the delivery report settings for outgoing messages
1  From your Home screen, tap , then tap Messaging.
2  Press , then tap Settings.
3  Tap Delivery report to activate or deactivate the delivery report.
4  When a message has been delivered to the recipient, ✓ appears in the message.

To view messages saved on the SIM card
1  From your Home screen, tap , then tap Messaging.
2  Press , then tap Settings > SIM messages.
Email

Use the Email application in your phone to send and receive emails through your regular email account or through your corporate account. Or you can do both. Your phone can handle several email accounts at the same time. You can set up these accounts to run through one combined inbox, or through separate inboxes. Note that emails you receive to your Gmail™ account can be accessed in the phone from both the Email and the Gmail™ applications.

💡 Your corporate Microsoft® Outlook® email messages have to be stored on a Microsoft® Exchange server for the functionality described above to work. See Synchronising your corporate email, calendar and contacts on page 68 for more information.

To set up an email account in your phone
1. From your Home screen, tap 📧.
2. Find and tap 📧.
3. Enter your email address and password, then tap Next.
4. If the settings for the email account cannot be downloaded automatically, complete the setup manually. If necessary, contact your email service provider for detailed settings. For corporate email setup on your phone, select Exchange Active Sync as the account type.
5. When you are prompted, enter a name for your email account, so that it is easily identifiable. The same name shows in the emails you send from this account. When you are finished, tap Next.

💡 You can set up more than one email account. See To add an extra email account in your phone on page 50.

Using email

To create and send an email message
1. From your Home screen, tap 📧, then find and tap 📧. The inbox of your default email account appears. If you want to use another email account that you have set up on your phone, tap the bar containing 📧, then select the account you want to send the message from.
2. Tap 📧.
3. Tap To and start typing the recipient’s email address. Matches are displayed in a dynamic list. Tap the relevant match or continue typing the complete email address. To add more recipients, enter a comma (,) or a semicolon (;) and start typing another name. To delete a recipient, tap 📧.
4. To select an email address saved in your contacts, tap 📧, then find and mark the checkbox next to a recipient field. To add more than one recipient, mark the checkboxes for the desired recipients. When you are finished, tap Done.
5. Tap the subject field and enter the email subject.
6. To attach a file, press 📧, then tap Attach file. Select the type of file, then tap the file you want to attach from the list that appears.
7. Tap the body text field and enter your message text.
8. To add Cc/Bcc fields, press 📧, then tap Add Cc/Bcc.
9. To send the email, tap 📧.
To receive email messages
1. From your Home screen, tap ✉.
2. Find and tap 📧. The inbox of your default email account appears.
3. If you want to check another email account that you have set up on your phone, tap the bar containing ⏳, then select the account you want to check. If you want to check all your email accounts at once, tap the bar containing ⏳, then tap Combined view.
4. To download new messages, tap 🔄.

💡 If you have set up a corporate email account, you can set the check frequency to Automatic (Push).

To read your email messages
1. From your Home screen, tap ✉.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ⏳, and select the account you want to check.
3. In the email inbox, scroll up or down and tap the email you want to read.
4. In the body text field, spread two fingers apart, or pinch them together, to zoom in or out.
5. Use the forward and backward arrows to read your next or previous message.

To view an email message attachment
1. From your Home screen, tap ✉.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ⏳, then select the account you want to check.
3. Find and tap the desired message in your email inbox. Emails with attachments are identified by 📂.
4. Tap the attachment tab in the email body. All attachments appear in a list.
5. Tap Load below an attachment item.
6. When the attachment is downloaded, tap View or Save.

To save a sender’s email address to your contacts
1. From your Home screen, tap ✉.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ⏳, then select the account you want to check.
3. Find and tap the desired message in your email inbox.
4. Tap the name of the sender.
5. Tap OK when you are prompted to add the name to your contacts.
6. Select an existing contact, or tap Create new contact if you want to create a new contact.
7. Edit the contact information and tap Done.

To reply to an email message
1. From your Home screen, tap ✉.
2. Find and tap 📧. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ⏳, then select the account you want to check.
3. Find and tap the message you want to reply to, then tap 📨.
4. To reply to all, tap ☰, then tap Reply all.
5. Enter your reply, then tap ✉.
To forward an email message
1. From your Home screen, tap 📧.
2. Find and tap 📮. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📥, then select the account you want to check.
3. Find and tap the message you want to forward.
4. Tap 📧, then tap Forward.
5. Tap To and enter the recipient’s address.
6. Enter your message text, then tap 📧.

To delete an email message
1. From your Home screen, tap 📧.
2. Tap 📮. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📥, then select the account you want to check.
3. In your email inbox, mark the checkbox for the email you want to delete, then tap 📧.

To search for emails
1. From your Home screen, tap 📧. Then find and tap 📮. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📥, then select the account you want to check.
2. Tap 📧.
3. Enter your search text, then tap the search key, or tap the confirm key on your keyboard.
4. The search result appears in a list sorted by date. Tap the email you want to open.

To mark a read email as unread
1. From your Home screen, tap 📧.
2. Find and tap 📮. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📥, then select the account you want to check.
3. Mark the checkbox for the desired email, then tap 📧.

To star an email
1. From your Home screen, tap 📧.
2. Find and tap 📮. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing 📥, then select the account you want to check.
3. Mark the checkbox for the email that you want to star, then tap 📧.

To unstar an email, mark it, then tap 📧.

To view all starred emails
1. From your Home screen, tap 📧, then find and tap 📮.
2. Tap 📧, then tap Starred. Starred emails from all your accounts appear in a list.
To manage your email in batches

1. From your Home screen, tap 📬, then find and tap ⚡. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ⏺, then select the account you want to check.
2. Mark the checkboxes for the emails you want to select.
3. When you are finished, tap one of the icons in the tool bar to, for example, move the selected emails to another folder.

To view all folders for one email account

1. From your Home screen, tap 📬, then find and tap ⚡. The inbox of your default email account appears. If you want to check another email account that you have set up on your phone, tap the bar containing ⏺, then select the account you want to check.
2. Tap 📚 to view all the folders in the account.

To change the inbox check frequency

1. From your Home screen, tap 📬.
2. Find and tap ⌚.
3. Press ⌚, then tap Settings.
4. If you are using several email accounts, tap the account you want to adjust.
5. Tap Inbox check frequency and select an option.

Using email accounts

To add an extra email account in your phone

1. From your Home screen, tap 📬.
2. Find and tap ⌚.
3. Press ⌚, then tap Settings.
4. Tap Add account.
5. Enter the email address and password, then tap Next.
6. If the settings for the email account cannot be downloaded automatically, complete the setup manually. If necessary, contact your email service provider for detailed settings.
7. When prompted, enter a name for your email account so that it is easily identifiable. The same name shows in the emails that you send from this account.
8. When you are finished, tap Next.

To set an email account as your default account

1. From your Home screen, tap 📬.
2. Find and tap ⌚.
3. Press ⌚, then tap Settings.
4. Tap the account you want to use as the default account for composing and sending emails.
5. Mark the Default account checkbox. The inbox of the default account appears every time you open the Email application.

If you only have one email account, this account is automatically the default account.

To remove an email account from your phone

1. From your Home screen, tap 📬.
2. Find and tap ⌚.
3. Press ⌚, then tap Settings.
4. Tap the account you want to remove.
5. Find and tap Remove account > OK.
Gmail™ and other Google™ services

If you have a Google™ account, you can use the Gmail™ application in your phone to read, write and organise email messages. After you set up your Google™ account to work in the phone, you can also chat to friends using the Google Talk™ application, synchronise your phone calendar application with your Google Calendar™, and download applications and games from Google Play™.

The services and features described in this chapter may not be supported in all countries or regions, or by all networks and/or service providers in all areas.

To set up a Google™ account in your phone
1. From your Home screen, tap Settings > Accounts & sync > Add account > Google.
2. Follow the registration wizard to create a Google™ account, or sign in if you already have an account. Your phone is now ready to use with Gmail™, Google Talk™ and Google Calendar™.

You can also sign in or create a Google™ account from the setup guide the first time you start your phone. Or you can go online and create an account at www.google.com/accounts.

To open the Gmail™ application
1. From the Home screen, tap Gmail™.
2. Find and tap Gmail™.
Google Talk™

You can use Google Talk™ instant messaging in your phone to chat with friends who also use this application.

To start Google Talk™
1. From your Home screen, tap 📱
2. Find and tap Talk.

To reply to an instant message with Talk
1. When someone contacts you on Talk, 📱 appears in the status bar.
2. Drag the status bar downwards, then tap the message and begin to chat.
Timescape™

Timescape™ collects all your communications into one integrated view. Events such as Facebook™ or Twitter™ updates appear as tiles in a chronological flow on the screen. Browse the files to get a snack-size preview of events before choosing to open them and view the full content. Timescape™ also features an infinite button that gives you access to a range of content about the item you are currently viewing.

The services and features described in this chapter may not be supported in all countries or regions, or by all networks and/or service providers in all areas.

To start Timescape™
1 From your Home screen, tap 🔍.
2 Find and tap Timescape™.
3 If you are starting Timescape™ for the first time, tap the tile in the welcome screen to set up Timescape.
4 Tap the Services screen to log in to social networking services such as Facebook™ or Twitter™, or to search for Timescape-related extensions in Google Play™.
5 If you do not want to log in to any social networking accounts or search Google Play™, tap Done.

Timescape™ main view

1 Shows your most recent update to a social networking service
2 Timescape™ tiles displayed in chronological order
3 Timescape™ event filter

Using Timescape™

To scroll through tiles in Timescape™
1 From your Home screen, tap 🔍.
2 Find and tap Timescape™.
3 Flick up or down to scroll through the tiles.

To preview a tile in Timescape™
1 From your Home screen, tap 🔍.
2 Find and tap Timescape™.
3 Scroll to the file you want to preview, and then tap it.
Timescape™ event filter

- All events
- Missed calls
- Received text and multimedia messages
- Updates from your Twitter™ contacts
- Updates from your Facebook™ contacts

To filter the events displayed in Timescape™
1. From your Home screen, tap 📄.
2. Find and tap Timescape™.
3. Tap or flick through the filter icons.

To refresh the main view in Timescape™
- When the Timescape™ event filter is set to show all events, press 🔄, then tap Refresh.

Tips: When you refresh the main view, your phone may connect to the Internet to update information from web service accounts that you have linked to Timescape™.

To log in to Facebook™ or Twitter™ from Timescape™
1. From your Home screen, tap 📄.
2. Find and tap Timescape™.
3. Press 📄, then tap Settings > Set up services.
4. Tap the service you want to log in to.
5. Enter your login details.

Tips: When you have logged in to a web service, you can update your status or view updates from the web service in Timescape™.

To update your Facebook™ or Twitter™ status in Timescape™
1. From your Home screen, tap 📄.
2. Find and tap Timescape™.
3. Tap 🔄 > Update status.
4. Tap the service for which you want to update your status. If you are not signed in to the service, you need to sign in before proceeding. When you have selected the desired service, tap Continue.
5. Tap the text field and enter your new status, then tap Post.

To log out of Facebook™ or Twitter™ from Timescape™
1. From your Home screen, tap 📄.
2. Find and tap Timescape™.
3. Press 📄, then tap Settings > Set up services.
4. Tap the service you want to log out of.

Tips: Your account information gets deleted when you log out.

Downloading new services for Timescape™
You can perform an extension search in Google Play™ and download new services for Timescape™. Such services include applications and plug-ins that add extra features to Timescape. For example, you can download applications that update Timescape with your activities on various social networking sites.
To download and install new services for Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Press 🔄, then tap Settings > Set up services > Extension search.
4. If you don’t have a Google account set up on your phone, follow the on-screen instructions to add one. Otherwise, you are directed straight to Google Play™.
5. In Google Play™, select a service to download from the list that appears, then follow the instructions to download and install it.

💡 You can delete installed Timescape services the same way you delete any other installed application.

To view an event in Timescape™
1. From the Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Scroll to and tap the tile for the desired event so it appears in preview mode. Then tap the tile again.

The infinite button in Timescape™
When you tap a tile, the infinite button ✝️ appears in the upper right corner. If the tile is connected to a contact, you can access related content by tapping the infinite button.

To view all communication with a contact in Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Tap a tile for an event related to a contact.
4. Tap ✝️. All communication with the contact appears.
5. Tap or flick the filter items at the bottom of the screen to view communication with the contact through other media.

Timescape™ settings

To access Timescape™ settings
1. From the Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Press 🔄, then tap Settings.

To schedule web service content updates in Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Press 🔄, then tap Settings > Update mode.
4. Tap the desired option. If you select Manual, no automatic updates get scheduled.

Timescape™ widget

The Timescape™ widget shows the latest Timescape™ events. For quick access, the Timescape™ widget can be added on your Home screen. See Home screen on page 18.
Timescape™ widget view

1 Timescape™ tile
2 Tap to refresh the view
3 Shortcut to the Timescape™ main view
4 Tap to update your status

⚠️ You cannot preview tiles when using the Timescape™ widget.

**To add the Timescape™ widget to your Home screen**
1 From your Home screen, press 📱.
2 Tap Add > Widgets.
3 Tap Timescape™ Widget.
4 Select an item you want to add.

**To remove the Timescape™ widget from your Home screen**
1 From your Home screen, touch and hold the Timescape™ widget.
2 Drag the widget to 🗑️.
Getting started with Google Play™

Open Google Play™ and enter a world of applications and games. You can browse these applications and games through different categories. You can also rate an application or game and send feedback on it.

To use Google Play™, you need to have a Google™ account. See To set up a Google™ account in your phone on page 51.

Google Play™ may not be available in all countries or regions

To open Google Play™
1 From the Home screen, tap 📲.
2 Find and tap Play Store.

Downloading from Google Play™

You can download all kinds of applications from Google Play™, including free applications.

Before you download applications
Before you start downloading from Google Play™, make sure that you have a working Internet connection.
Also, remember that you might incur data traffic charges when you download content to your phone. Contact your operator for more information.

To download a free application
1 In Google Play™, find an item you wish to download by browsing categories, or by using the search function.
2 Tap the item to view its details, and follow the instructions to complete the installation.
3 If the application you want to download requires access to your data or control of any functions on your phone, an additional screen appears with details. Read this screen carefully because the functionality of your phone may be seriously affected if you proceed. Tap OK if you agree, or Cancel if you wish to cancel the download.

To download a paid application
1 In Google Play™, find an item you wish to download by browsing categories, or by using the search function.
2 Tap the item to view its details, and follow the instructions in your phone to complete your purchase.
3 If the application you want to download requires access to your data or control of any functions on your phone, an additional screen appears with details. Read this screen carefully because the functionality of your phone may be seriously affected if you proceed. Tap OK if you agree, or Cancel if you wish to cancel the download.

To open a downloaded application
1 In Google Play™, press 📲, then tap My Apps.
2 Tap the downloaded application.

You can also access downloaded applications from the Application screen.

Clearing your application data

You may sometimes need to clear data for an application. This might happen if, for example, the application memory becomes full, or you want to clear high scores for a
game. You might also want to erase incoming email, text and multimedia messages in some applications.

**To clear all cache for an application**

1. From your Home screen, tap 📱.
2. Find and tap Settings.
3. Tap Apps.
4. Tap the application for which you want to clear all cache.
5. Tap Clear cache.

❗ It is not possible to clear the cache for some applications.

**To delete an installed application**

1. From your Home screen, tap 📱.
2. Find and tap Settings.
3. Tap Apps.
4. Select the application that you want to delete.
5. Tap Uninstall.

❗ It is not possible to delete some preinstalled applications.

**Permissions**

Some applications need to access parts of your phone to be able to work properly. For example, a navigation application needs permissions to send and receive data traffic, and access your location. Some applications might misuse their permissions by stealing or deleting data, or reporting your location. Make sure you only install and give permissions to applications you trust.

**To view permissions of an application**

1. From your Home screen, tap 📱.
2. Find and tap Settings.
3. Tap Apps.
4. Tap the desired application.
5. Scroll down to view the relevant details under Permissions.

**Installing applications not from Google Play™**

Installing applications of unknown or unreliable origin can damage your phone. By default, your phone is set to block such installations. However, you can change this setting and allow installations from unknown sources.

❗ Sony does not warrant or guarantee the performance of any third-party applications or content transferred via download or other interface to your phone. Similarly, Sony is not responsible for any damage or reduced performance of your phone attributable to the transfer of third-party content. Only use content from reliable sources. Contact the content provider if you have any questions or concerns.

**To allow the installation of applications not from Google Play™**

1. From your Home screen, tap 📱.
2. Find and tap Settings > Security.
3. Mark the Unknown sources checkbox.
PlayNow™ service

You can use the PlayNow™ service to download applications, music, games, ringtones and wallpapers. The PlayNow™ service offers both free and non-free downloads.

* The PlayNow™ service is not available in all countries.

Before you download content

Before you download, make sure that you have an Internet connection. Also, you may need to have a memory card inserted in your phone to download content.

⚠️ When you download content to your phone, you might be charged for the amount of data transferred. Contact your operator for information about data transfer rates in your country.

To start PlayNow™

1. From the Home screen, tap 📱.
2. Find and tap 📱.

Downloading from the PlayNow™ service

Download a range of content from the PlayNow™ service direct to your phone. Choose from a variety of applications, games, music, ringtones and other content. Note that payment options for non-free applications may vary per country.

To download a PlayNow item to your phone

1. From your Home screen, tap 📱.
2. Find and tap PlayNow™.
3. Find an item you want to download by browsing categories, or by using the search function.
4. Tap the item to view its details.
5. Click “Buy now!” to start the purchase process. After your purchase has been validated, you can start to download your content.
Video Unlimited™

Use the Video Unlimited™ service to rent and purchase videos that you can view not only on your phone, but also on your PC. Select your pick from the latest Hollywood releases, action movies, comedies, classics, and a range of other categories.

⚠️ Video Unlimited™ might not be available in all countries or regions.

**To open Video Unlimited™**

1. From your Home screen, tap 📱.
2. Find and tap 📩.

**Video Unlimited™ menu overview**

- View your account information
- Search for a video
- View the download status for all your items
- View and change settings for your account, purchases, and downloads
- Add the current video to a wish list
- Delete all items in your wish list
- Delete the video you're currently viewing from the wish list
- Share information about the current video via a social network, email, Bluetooth or other method
- View legal information

⚠️ The Video Unlimited™ menu is dynamic, which means that all options are not always available. For example, the option to delete all items in your wish list is only available when you are viewing the list.

**To open the Video Unlimited™ menu**

- Open Video Unlimited, then press 📱.

**Creating a Video Unlimited™ account**

You need to create a Video Unlimited™ account if you want to buy or rent movies through the Video Unlimited™ service.

**Exploring the Video Unlimited™ selection**

Browse videos by category, or enter text to search for a particular item. You can also choose to preview videos you're interested in.

**Renting or buying a video**

When you rent a video, you have a fixed amount of time in which to view it. This time period varies from market to market. You can also choose to download a purchased video to most Sony™ devices that are connected to your Video Unlimited™ account.

**Video Unlimited™ notifications overview**

When you buy or rent videos, the following notifications may appear:
Watching a video from Video Unlimited™

You can watch your rented or purchased videos on most Sony™ device that are connected to your Video Unlimited™ account.

Video menu overview

When you watch a video from Video Unlimited™, you can open a menu to get the following options:

- Delete the current video
- View information about the current video
- Change the audio language
- Change the language of subtitles, or remove subtitles
Music Unlimited™

Music Unlimited™ is a subscription-based service that offers access to millions of songs over a 3G or Wi-Fi® connection. You can manage and edit your personal music library in the cloud from a variety of devices, or sync your playlists and music using a PC that runs the Windows® operating system. Go to www.sonyentertainmentnetwork.com for more information.

⚠️ Music Unlimited™ might not be available in all countries or regions.

To open Music Unlimited™

1. From your Home screen, tap 📲.
2. Find and tap 🎵.
Getting organised

Calendar

Your phone has a calendar for managing your time schedule. If you have a Google™ account, you can also synchronise your phone calendar with your web calendar. See Synchronising data on your phone on page 67.

To set the calendar view
1 From your Home screen, tap ☑, then find and tap Calendar.
2 Press ⊕ and select an option.

To view multiple calendars
1 From your Home screen, tap ☑, then find and tap Calendar.
2 Press ☑, then tap My calendars.
3 Select the calendars you want to view.

To create a calendar event
1 From your Home screen, tap ☑, then tap Calendar.
2 Press ☑, then tap New event.
3 Enter the name, time, location and description for the event.
4 If desired, select another option under Repetition.
5 Select a reminder for the event. To add a new reminder for the event, tap ☑.
6 Tap Save.

💡 When the appointment time approaches, your phone plays a short sound to remind you. Also, 🕒 appears in the status bar.

To view a calendar event
1 From your Home screen, tap ☑, then tap Calendar.
2 Tap the event you want to view.

To change the calendar settings
1 From your Home screen, tap ☑, then tap Calendar.
2 Press ☑, then tap More > Settings.
3 Tap to open the setting you want to change, and edit as desired.

Alarm clock

Use your phone as an alarm clock and select any sound in your phone as your alarm signal. The alarm does not sound if your phone is turned off. But it does sound when your phone is set to silent mode.

To open the alarm clock
1 From your Home screen, tap ☑.
2 Find and tap Alarms.

💡 You can also open the alarm clock by tapping the analog clock after adding it as widget to your Home screen.
To set a new alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap Add alarm.
4 Adjust the time by scrolling up and down.
5 Tap Set.
6 If desired, edit other alarm settings.
7 Tap Done.

To edit an existing alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap the alarm you want to edit.
4 Tap Time.
5 Scroll up or down to adjust the time.
6 Tap Set.
7 If desired, edit other alarm settings.
8 Tap Done.

To deactivate an alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap one of the marked alarms.
4 Unmark the Turn alarm on checkbox.

To activate an existing alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap one of the unmarked alarms.
4 Mark the Turn alarm on checkbox.

To delete an alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap the alarm you want to delete.
4 Tap Delete, then tap OK.

To set the ringtone for an alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap the alarm you want to edit.
4 Tap Ringtone and select an option.
5 Tap Done.

To set a recurring alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap the alarm you want to edit.
4 Tap Repeat.
5 Mark the checkboxes for the desired days, then tap OK.

To set the title for an alarm
1 From your Home screen, tap 📺.
2 Find and tap Alarms.
3 Tap the alarm you want to edit.
4 Tap Label and enter a name for the alarm.
5 Tap OK.
To activate the vibrate function for an alarm
1. From your Home screen, tap 🔄.
2. Find and tap Alarms.
3. Tap the alarm you want to edit.
4. Mark the Vibrate checkbox.

To set alarms to sound when the phone is in silent mode
1. From your Home screen, tap 🔄.
2. Find and tap Alarms, then press 🔄.
3. Tap Settings.
4. Mark the Alarm in silent mode checkbox.

To snooze an alarm when it sounds
- When the alarm sounds, tap Snooze.

To turn off an alarm when it sounds
- When the alarm sounds, tap Dismiss.
Scanning with the **NeoReader™ application**

Use your phone as a barcode scanner to find out more about items you scan. For example, you see a coat in a magazine ad and want to find the nearest retail outlet to buy it. If the ad contains a readable barcode, the NeoReader™ application uses this code to access mobile web content, such as a web page with more product information or a map of nearby outlets. NeoReader™ supports most standard barcode types.

**To start the NeoReader™ application**

1. From the Home screen, tap 📱.
2. Find and tap [NeoReader™](#).

**To scan a barcode**

1. When the NeoReader™ application is open, hold the phone camera over the barcode until the complete barcode is visible in the viewfinder.
2. The phone automatically scans the barcode, and vibrates when the barcode is recognised. If the barcode is not recognised, tap [.scan](#) to scan the code manually.

! Some bar codes might be too small to scan.

**To enter a barcode manually**

1. When the NeoReader™ application is open, tap [ ].
2. Tap the text field, then enter the numbers of the barcode.

**NeoReader™ application menu overview**

The following menu options are available in the NeoReader™ application:

- Capture the barcode using a higher image resolution in cases where NeoReader™ does not recognise the barcode automatically.
- Enter the bar code numbers manually. This option can be used if your camera has difficulty reading the bar code.
- View a list of previously scanned bar codes.
- Select preferences for how you use the NeoReader™ application.
- View information about the NeoReader™ application.
- Read more about different bar code types, and about how to use NeoReader™.
- Select your personal settings, such as language or country. This information is used to personalise bar code content.
- Send a text message to invite a friend to download the NeoReader™ application.
Synchronising data on your phone

You can sync contacts, email, calendar events, and other information with your phone from multiple email accounts, synchronisation services and other kinds of accounts, depending on the applications installed on your phone. Synchronising your phone with other information sources is an easy and practical way to stay up to date.

You can:

- access your Gmail™, Google Calendar™, Google™ contacts, Google™ Chrome bookmarks and other Google services you use.
- access your corporate email, contacts and calendar applications.
- access your Facebook™ contacts, calendar, albums and other services you use.
- synchronise your phone with an Internet server using SyncML™.

Synchronising with Google™

Synchronise your phone with your Gmail™, Google Calendar™, Google™ contacts, Google™ Chrome bookmarks and data from other Google services you use. View and manage them from your phone just as easily as you would from a computer.

After synchronising, you can find Gmail™ in the Gmail™ application; Google Calendar™ in the Calendar application; Google™ contacts in the Contacts application; and other data in corresponding Google applications that you have installed.

To set up a Google™ account in your phone for synchronisation

1. From your Home screen, tap "Settings > Accounts & sync.
2. Make sure that synchronisation is turned on so that applications can synchronise data automatically.
3. Tap Add account > Google.
4. Follow the registration wizard to create a Google™ account, or sign in if you already have an account.
5. Mark the Back up & restore checkbox if you want to back up data to your Google™ account, then tap Accept.
6. Tap Done.
7. Tap your newly created Google™ account, then tap the items you want to synchronise.

To synchronise manually with your Google™ account

1. From the Home screen, tap "Settings > Accounts & sync.
2. Tap the Google™ account you want to synchronise.
3. Press "Run" then tap Sync now.

To synchronise your browser with Google™ Chrome

1. From your Home screen, tap "Settings > Accounts & sync.
2. Tap the Google™ account, then mark the relevant checkbox to synchronise the browser.

To remove a Google™ account from your phone

1. From your Home screen, tap "Settings > Accounts & sync.
2. Tap the Google™ account you want to remove from the accounts list.
3. Press "Run" then tap Remove account.
4. Tap Remove account again to confirm.
Synchronising your corporate email, calendar and contacts

Access your corporate email messages, calendar appointments and contacts directly from your phone. View and manage them just as easily as you would from a computer. After setup, you can find your information in the Email, Calendar and Contacts applications.

⚠️ For you to access the functionality described above, your corporate information must be stored on a Microsoft® Exchange server.

To set up corporate email, calendar and contacts in your phone
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync.
3. Make sure that synchronisation is turned on so that your data synchronises automatically according to the sync interval you set.
4. Tap Add account > Corporate.
5. Enter your corporate email address and password.
6. Tap Next. Your phone begins to retrieve your account information. If a failure occurs, contact your corporate network administrator for more information such as the domain name and Exchange server address.
7. Tap OK to allow your corporate server to control your phone.
8. Select what data you want to sync with the phone, such as contacts and calendar entries.
9. If desired, activate the device administrator to allow your corporate server to control certain security features in your phone. For example, allow your corporate server to set password rules and set storage encryption.
10. When the setup is done, you can enter a name for the corporate account so that it can be easily identified.

To edit the setup of corporate email, calendar and contacts
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync and select your corporate account.
3. Tap Account settings, then tap the corporate account that you want to edit.
4. Change the desired settings.

To set a synchronisation interval for a corporate account
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync and select your corporate account.
3. Tap Account settings, then tap the corporate account for which you want to set a synchronisation level.
4. Tap Inbox check frequency and select an interval option.

To remove a corporate account from your phone
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync, then tap your corporate account.
3. Press ☑, then tap Remove account.
4. Tap Remove account again to confirm.

Synchronising with Facebook™ inside your Xperia™ phone

There are two ways to use Facebook™ on your phone. Apart from using the standard Facebook application to access your online Facebook account, you can also choose to synchronise your Facebook account with your phone. To do this, you need to set up a Facebook™ inside Xperia™ account, which allows you to directly access Facebook content from a number of other applications in the phone. For example, you can make Facebook posts from Timescape™ and access your Facebook contacts, photos and calendar entries from related applications in the phone, such as the Calendar application.
To set up a Facebook™ inside Xperia™ account on your phone
1 From your Home screen, tap 📱.
2 Tap Settings > Accounts & sync.
3 Make sure that synchronisation is turned on so that applications can synchronise data automatically.
4 Tap Add account > Facebook inside Xperia™.
5 Follow the on-screen instructions to create a Facebook™ inside Xperia™ account, or sign in if you already have an account.

You can also set up a Facebook™ inside Xperia™ account on your phone by marking the Facebook integration checkbox under Settings > Xperia™ > Facebook inside Xperia™.

To synchronise manually with your Facebook™ inside Xperia™ account
1 From your Home screen, tap 📱.
2 Tap Settings > Accounts & sync.
3 Tap the Facebook inside Xperia™ account.
4 Press ⏯️, then tap Sync now.

To remove a Facebook™ inside Xperia™ account from your phone
1 From your Home screen, tap 📱.
2 Tap Settings > Accounts & sync.
3 Tap the Facebook inside Xperia™ account.
4 Press ⏯️, then tap Remove account.
5 Tap Remove account again to confirm.

Synchronising using SyncML™
Synchronise your phone with an Internet server using SyncML™. View and manage contacts, calendar and bookmarks from your phone just as easily as you would from a computer.

To set up a SyncML™ account in your phone
1 From your Home screen, tap 📱.
2 Find and tap Settings > Accounts & sync.
3 Make sure that synchronisation is turned on so that your data synchronises automatically according to the interval you set.
4 Tap Add account > SyncML.
5 Tap the account, server address, username and password fields, and enter the information required.
6 Tap Sync interval and select how often you want the phone to synchronise automatically.
7 Tap an item that you want to synchronise, for example, contacts. Then enter the server address, username, and password. Repeat this step for each item you want to synchronise.
8 When you're finished, tap Done.
9 Contact your SyncML™ service provider for more information about your account settings.

To synchronise manually with your SyncML™ account
1 From your Home screen, tap 📱.
2 Tap Settings > Accounts & sync.
3 Tap the SyncML™ account that you want to synchronise.
4 Press ⏯️, then tap Sync now.
To set a synchronisation interval
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync, then tap your SyncML™ account.
3. Tap Account settings.
4. Tap Sync interval and select an interval option.

To remove a SyncML™ account from your phone
1. From your Home screen, tap 📱.
2. Tap Settings > Accounts & sync, then tap your SyncML™ account.
3. Press 📱, then tap Remove account.
4. Tap Remove account again to confirm.
Connecting to wireless networks

You can access the Internet wirelessly from your phone using Wi-Fi® technology. This way you can browse the web and access cheaper call and data rates.

If your company or organisation has a virtual private network (VPN), you can connect to this network with your phone. You can use a VPN to access intranets and other internal services at your company.

Wi-Fi®

Using Wi-Fi® technology you can access the Internet wirelessly with your phone. To access the Internet using a Wi-Fi® connection, you first need to search for and connect to an available Wi-Fi® network. The signal strength of the Wi-Fi® network may differ depending on your phone’s location. Moving closer to the Wi-Fi® access point may increase the signal strength.

Before using Wi-Fi®

To browse the Internet using a Wi-Fi® connection, you need to search for and connect to an available Wi-Fi® network and then open the Internet browser. The signal strength of the Wi-Fi® network may differ depending on your phone’s location. Move closer to the Wi-Fi® access point to increase the signal strength.

To turn on Wi-Fi®

1. From your Home screen, tap Settings.
2. Find and tap Settings.
3. Tap OFF beside Wi-Fi so that OFF changes to ON. The phone scans for available Wi-Fi® networks.

! It may take a few seconds before Wi-Fi® is enabled.

To connect to a Wi-Fi® network

1. From the Home screen, tap Settings.
2. Find and tap Settings.
3. Make sure that the Wi-Fi® function is on. Tap Wi-Fi.
4. Available Wi-Fi® networks are displayed. The available Wi-Fi® networks may be open or secured. Open networks are indicated by and secured networks are indicated by next to the Wi-Fi® network name.
5. Tap a Wi-Fi® network to connect to it. If you are trying to connect to a secure Wi-Fi® network, you are asked to enter a password. is displayed in the status bar once you are connected.

! Your phone remembers Wi-Fi® networks you connect to. The next time you come within reach of a previously connected Wi-Fi® network, your phone automatically connects to it.

! In some locations, open Wi-Fi® networks require you to log in to a web page before you can get access to the network. Contact the relevant Wi-Fi® network administrator for more information.

To connect to another Wi-Fi® network

1. From your Home screen, tap Settings.
2. Find and tap Settings > Wi-Fi. Detected Wi-Fi® networks are displayed.
3. Tap another Wi-Fi® network to connect to it.

To scan for Wi-Fi® networks manually

1. From your Home screen, tap Settings.
2. Find and tap Settings > Wi-Fi.
3. Tap Scan. The phone scans for Wi-Fi® networks and displays available networks in a list.
4. Tap a Wi-Fi® network in the list to connect to it.
**Advanced Wi-Fi® settings**

Before you add a Wi-Fi® network manually, you need to turn on the Wi-Fi® setting in your phone.

**Wi-Fi® network status**

When you are connected to a Wi-Fi® network or when there are Wi-Fi® networks available in your vicinity, it is possible to see the status of these Wi-Fi® networks. You can also enable the phone to notify you whenever an open Wi-Fi® network is detected.

**To enable Wi-Fi® network notifications**

1. Turn on Wi-Fi®, if it is not already on.
2. From your Home screen, tap Settings > Wi-Fi.
3. Press ☰.
4. Tap Advanced.
5. Mark the Network notification checkbox.

**To add a Wi-Fi® network manually**

1. From the Home screen, tap ☰.
2. Find and tap Settings > Wi-Fi.
3. Tap Add network.
4. Enter the Network SSID for the network.
5. Tap the Security field to select a security type.
6. If required, enter a password.
7. Tap Save.
8. Contact your Wi-Fi® network administrator to get the Network SSID name and password.

**To view detailed information about a connected Wi-Fi® network**

1. From the Home screen, tap ☰.
2. Find and tap Settings > Wi-Fi.
3. Tap the Wi-Fi® network that you are currently connected to. Detailed network information is displayed.

**Wi-Fi® sleep policy**

By adding a Wi-Fi® sleep policy, you can specify when to switch from Wi-Fi to mobile data.

* Contact your Wi-Fi® network administrator to get the Network SSID name and password.

**To add a Wi-Fi® sleep policy**

1. From the Home screen, tap ☰.
2. Find and tap Settings > Wi-Fi.
3. Press ☰.
4. Tap Advanced.
5. Tap Keep Wi-Fi on during sleep.
6. Select an option.

**Connected devices**

Share media files in your phone with other devices over a shared Wi-Fi® connection. When your phone is connected to your home network via Wi-Fi® and has the Connected devices function turned on, other client devices connected to the same home network can access media files saved on your phone. For example, you can view photos or play a music track on a connected client device. A connected client device can be, for example, a computer with client software, a camera, TV, or a PlayStation®3. All devices must be DLNA Certified™ by the Digital Living Network Alliance.
To set up file sharing using the Connected devices feature

1. Connect your phone to a Wi-Fi® network.
2. From your Home screen, tap ☰, then find and tap Connected Devices.
3. Tap ☰ and edit your phone name, if desired. This name will later appear on other client devices connected to the Wi-Fi network, to identify your phone.
4. Mark the Share content checkbox. ☰ appears in the status bar. Your phone can now work as a media server.
5. Connect your computer or other devices to the same Wi-Fi® network as your phone.
6. A notification appears in the status bar of the phone. Tap it and set access permissions.
7. To close the Connected Devices view, press ☰. The Media server function stays running in the background.
8. To turn off the media server, go to the Connected Devices view in the phone and unmark the Share content checkbox.

! The instructions described above may differ depending on the client devices. Also refer to your client device User guide. If the device cannot connect, check that your local network is working.

To set access permissions for a pending client device

1. From your Home screen, tap ☰, then find and tap Connected devices.
2. Select a client device from the Pending devices list.
3. Select an access permission level.

To change the name of a registered client device

1. From your Home screen, tap ☰, then find and tap Connected devices.
2. Select a client device from the Registered devices list, then select Change name.
3. Enter a new name for the client device.

To change the access level of a registered client device

1. From the Home screen, tap ☰, then find and tap Connected devices.
2. Select a client device from the Registered devices list.
3. Tap Change access level and select an option.

To get help about sharing content with other devices

• When the Connected Devices view is open, press ☰, then tap Help.

Sharing your phone’s mobile data connection

You can share your phone’s mobile data connection with a single computer using a USB cable. This process is called USB tethering. You can also share your phone’s data connection with up to eight devices at once, by turning your phone into a portable Wi-Fi® hotspot.

When your phone is sharing its data connection, the following icons may appear in the status bar or in the Notification panel:

- USB tethering is active
- Portable Wi-Fi® hotspot is active
- Both USB tethering and portable hotspot are active
To share your phone’s data connection using a USB cable

1. Deactivate all USB cable connections to your phone.
2. Using the USB cable that came with your phone, connect your phone to a computer.
3. From your Home screen, tap 📱.
4. Find and tap Settings > More... > Tethering & portable hotspot.
5. Mark the USB tethering checkbox. The phone starts sharing its mobile network data connection with the computer over the USB connection. An ongoing notification appears in the status bar and the Notification panel.
6. Unmark the USB tethering checkbox, or disconnect the USB cable to stop sharing your data connection.

⚠️ You cannot share your phone’s data connection and SD card over a USB cable at the same time. For more information, see Connecting your phone to a computer on page 100.

💡 You may need to prepare your computer to establish a network connection via USB cable. Go to android.com/tether to get the most current information.

To share your phone’s data connection as a portable Wi-Fi® hotspot

1. From the Home screen, tap 📱.
2. Find and tap Settings > More... > Tethering & portable hotspot.
3. Tap Configure Wi-Fi hotspot.
4. Enter the Network SSID for the network. Tap the Security field to select a security type.
5. If required, enter a password.
6. Tap Save.
7. Mark the Portable Wi-Fi hotspot checkbox. The phone starts broadcasting its Wi-Fi® network name (SSID). You can now connect to this network with up to 8 computers or other devices.
8. Unmark the Portable Wi-Fi hotspot checkbox when you want to stop sharing your data connection via Wi-Fi®.

To rename or secure your portable hotspot

1. From the Home screen, tap 📱.
2. Find and tap Settings > More... > Tethering & portable hotspot.
3. Tap Configure Wi-Fi hotspot.
4. Enter the Network SSID for the network.
5. To select a security type, tap the Security field.
6. If required, enter a password.
7. Tap Save.

Virtual private networks (VPNs)

Use your phone to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from outside the actual network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are travelling.

VPN connections can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate in your phone. See Connecting your phone to a computer on page 100 for more information on how to transfer content to your phone. For detailed information on how to set up a connection to your virtual private network, please contact the network administrator of your company or organisation.
To add a virtual private network
1 From your Home screen, tap 📱.
2 Find and tap Settings > More… > VPN.
3 Tap Add VPN network.
4 Select the type of VPN to add.
5 Enter your VPN settings.
6 Tap Save.

To connect to a virtual private network
1 From your Home screen, tap 📱.
2 Find and tap Settings > More… > VPN.
3 In the list of available networks, tap the VPN that you want to connect to.
4 Enter the required information.
5 Tap Connect.

To disconnect from a virtual private network
1 Drag the status bar downwards.
2 Tap the notification for the VPN connection to turn it off.
Web browser

Use your web browser to view and navigate web pages, add pages as bookmarks, and save pages for offline viewing. You can open up to 16 windows at the same time and switch among them easily. You can also request the desktop version of a web page if you don’t want to view the mobile version.

To open the web browser
1. From your Home screen, tap 🌐.
2. Find and tap 🌐.

Browsing the web

Search and address bar
Use the search and address bar to browse the web.

1. View the download progress of the current web page
2. Enter a search word to search for a web page, or enter a web page address to load a web page
3. Cancel the download of the current web page

Sometimes the search and address bar is not displayed after a web page finishes downloading. It appears again if you flick downwards on the screen.

To go to a web page
1. Tap the search and address text field to activate the keypad.
2. Enter a web address.
3. Tap Go.

To search a web page
1. Tap the search and address text field to activate the keypad.
2. Enter a search word.
3. Tap Go.

To exit the web browser
• While browsing, press 🏛.

When you open the browser again, even after restarting the phone, the browser appears exactly as it did before you exited. For example, the same number of windows will be open.

Navigating web pages

To select a link
• To select a link in a web page, tap the link. The selected link gets highlighted, and the web page starts to load after you release your finger.

If you select a link by mistake before releasing your finger, you can drag your finger away from the link to deselect it.

To go to the previous page while browsing
• Press ⏪.
To zoom in or out on a web page
Use one of the following methods to zoom in or out on a web page:

- Double-tap to zoom in on the web page, or double-tap again to zoom out.
- Touch an area of the page with two fingers at once and spread them apart to zoom in, or pinch them together to zoom out.

To reload the current web page

- Press \[ \text{ } \] then tap \text{Refresh}.\[ \text{ } \]

To save a web page for offline viewing

1 After the web page has loaded, press \[ \text{ } \].
2 Tap \text{Save for offline reading}. You are then directed to the \text{Saved pages} tab, where you can view all saved web pages.

! If the memory card is not available, the web page cannot be saved.

To view a previously saved web page

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap \[ \text{ } \] next to the search and address bar.
3 Tap \[ \text{ } \], then tap the \text{Saved pages} tab.
4 Find and select a web page that you want to view.

To load the live version of an offline web page

1 When an offline web page is open, press \[ \text{ } \].
2 Tap \text{Go live}.

To request the desktop version of a web page

1 While browsing the web page, press \[ \text{ } \].
2 Tap \text{Request desktop site}.

! Once you choose to view the desktop version of a web page in a window, any other web pages that you view later in the same window will also show their desktop versions. Tap \text{Request desktop site} again to change the setting back.

To share a link to the current web page

1 While browsing, press \[ \text{ } \].
2 Tap \text{Share page}.
3 Select an available transfer method, then follow the on-screen instructions.

To close a browser window

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap \[ \text{ } \] next to the search and address bar. A list of all open windows appears.
3 Tap \[ \text{ } \] in the window you want to close, or flick the window left or right off the screen to close it.

Managing bookmarks

Bookmarks let you access your favourite and frequently visited web pages quickly. You can add bookmarks directly from your phone browser. You can also synchronise your phone browser with Google™ Chrome bookmarks that you have synchronised to your Google account using a computer. See To synchronise your browser with Google™ Chrome on page 67.

Depending on your network operator, some bookmarks may be pre-installed on your phone.
To bookmark a web page
1 While you are viewing the web page, press .
2 Tap Save to bookmarks.
3 If desired, edit the bookmark.
4 When you’re done, tap OK.

To open a bookmark
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap . The names of any accounts that you have synchronised with Google™ Chrome are displayed. Bookmarks that you have saved directly on the phone are listed under the Local account.
3 To show an account’s bookmarks, tap the account. All bookmarks in the account are displayed.
4 To open a bookmark, tap it.

To edit a bookmark
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Touch and hold a bookmark.
4 In the menu that appears, tap Edit bookmark.
5 Edit the bookmark as desired.
6 When you’re done, tap OK.

To add a bookmarked web page to your Home screen
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Tap and hold a bookmark that you want to add to your Home screen.
4 In the menu that appears, tap Add shortcut to home.

To delete a bookmark
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Touch and hold a bookmark.
4 In the menu that appears, tap Delete bookmark to delete the selected bookmark.

To bookmark a previously visited web page
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .
3 Tap the History tab, then tap one of the down arrows to view a list of previously visited web pages.
4 Tap beside the web page that you want to add as a bookmark.
5 If desired, edit more detailed information such as the name and location of the bookmark.
6 When you’re done, tap OK.
Managing text and images

To find text within a web page
1 When you are viewing a web page, press .
2 Tap Find on page.
3 Enter your search text. Characters that match your search get highlighted on the web page.
4 Tap the up or down arrows to go to the previous or next highlighted item.
5 Tap ✓ to close the search bar.

To copy text from a web page
1 Touch and hold part of the text you want to copy until it becomes highlighted. Tabs appear at each end of the selection. Drag the tabs accordingly to select all the text that you want to copy.
2 Tap , then tap Copy.
3 To paste text into an email, text message or multimedia message, touch and hold the text field in the relevant application and tap Paste in the menu that appears.

! If the text that you want to copy is part of a link to another web page, a menu appears in which you need to tap Select text before you can continue.

To save an image from a web page
1 On the active web page, touch and hold the desired image until a menu appears.
2 Tap Save image.

! If the memory card is not available, the image cannot be saved.

Multiple windows

Your browser can run up to 16 different windows at the same time. You can, for example, log in to your webmail in one window and read the daily news in another. You can easily switch from one window to another. If you want to browse the web with more privacy, you can use the incognito tab to open a window that saves no personal information or cookies while you’re connected through it.

To open a new browser window
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar, then tap .

To open an incognito window
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar.
3 Press , then tap New incognito tab.

To open a link in a new browser window
1 Touch and hold a link until a menu appears.
2 Tap Open in new tab.

To switch between browser windows
1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap next to the search and address bar.
3 Scroll up and down to browse a list of all open windows.
4 Tap the window that you want to switch to.
Downloading from the web
You can download applications and content when you browse the web using the web browser in your phone. Usually you have to touch a download link for the desired file and the download then starts automatically.

To view your downloaded files
1 Make sure that you have inserted a memory card in your phone before viewing any previously downloaded files (to the card).
2 From your Home screen, tap Downloads.
3 Find and tap Downloads.

To cancel an ongoing download
1 When your phone starts downloading a file, drag down the status bar and tap the file you are downloading.
2 Mark the checkbox beside the downloading file that you want to cancel.
3 Tap .

Browser settings
You can change the browser settings and customise your browser view. For example, you can change the size of the text displayed to suit your needs, or you can clear cache, cookies, browser history, and other data linked to the websites you visit.

To change your browser settings
1 When the browser is open, press .
2 Tap Settings.

To change the text size on web pages
1 When the browser is open, press .
2 Tap Settings > Accessibility.
3 Adjust the text size settings as desired.

To clear the cache memory from your phone
1 When the browser is open, press .
2 Tap Settings > Privacy & security.
3 Tap Clear cache, then tap OK to confirm.

To clear your browser cookies
1 When the browser is open, press .
2 Tap Settings > Privacy & security.
3 Tap Clear all cookie data, then tap OK to confirm.

To clear your browser history
1 When the browser is open, press .
2 Tap Settings > Privacy & security.
3 Tap Clear history, then tap OK to confirm.

Auto-fitting web pages
Your browser has an auto-fit option which makes it easier to read large web pages with lots of text and images, such as news pages. When this option is enabled, your browser automatically refits images and columns of text on the screen when you double-tap the screen directly after zooming with your fingers. If auto-fit is disabled, you may need to scroll sideways to read a full sentence.

To auto-fit web pages
1 When the browser is open, press .
2 Tap Settings > Advanced > Auto-fit pages.
Auto-filling text
Auto-filling allows you to automatically enter data such as names and addresses on various web forms, so you don’t have to enter the same information repeatedly on different web pages.

To create text for auto-filling
1 When the browser is open, press 📙.
2 Tap Settings > General.
3 Mark the Form auto-fill checkbox, if it is not already marked.
4 Tap Auto-fill text, then enter text that you want to use for auto-filling on web forms, for example, your name and address.
5 When you’re done, tap Save.

Plug-in settings
You can adjust how a plug-in functions on a web page. For example, you can enable plug-ins to get optimal visual effect when you view a web page. Alternatively, to increase browsing speed, you can configure your browser to only run plug-ins on demand, or you can disable plug-ins completely.

To enable plug-ins on demand
1 When the browser is open, press 📙.
2 Tap Settings > Advanced > Enable plug-ins.
3 Mark the On demand checkbox.
💡 You may need to restart your browser for the setting to take effect.
Music

Get the most out of your music player. Listen to and organise music, audio books and podcasts that you have transferred to your memory card from a computer, or purchased and downloaded from online stores.

To make content easily available to the music player, you can use the Media Go™ application. Media Go™ helps transfer music content between a computer and a phone. For more information, see Connecting your phone to a computer on page 100.

Copying media files to your memory card

Copy all your favourite media content from computer to phone and start using your phone's entertainment features to the full. It's easy to transfer music, photos, videos and other files. Just connect your phone to a computer with a USB cable and use one of the following methods:

- Use a file manager application, for example, Windows Explorer.
  See To transfer content between a phone and computer using a USB cable on page 100
- Use the Media Go™ computer application.
  See Media Go™ on page 101

See Connecting your phone to a computer on page 100 for more general information about connecting your phone and transferring files.

Using the music player

To play audio content

1. From your Home screen, tap Media >  to open the music player. If  is not displayed, tap  , then find and tap  .
2. Tap  to open the music library.
3. Tap  to browse audio by artist. Tap  to browse by album. Tap  to browse by playlist. Tap  to browse audio by track.
4. To browse to a track, scroll up or down.
5. Tap a track to play it.

Music player overview

1. Browse the music on your memory card
2. Tap the infinite button to find related information online

**To change tracks**

- In the music player, tap or .

**To pause a track**

- In the music player, tap .

**To fast forward and rewind music**

- In the music player, touch and hold or .
  - You can also drag the progress indicator marker right or left.

**To adjust the audio volume**

- When the music player is playing a track, press the volume key.

**To improve the sound with the equalizer**

1. When the music player is open, press .
2. Tap Equaliser.
3. Select a music style.

**To view a current play queue**

- In the music player, tap .

**To minimise the music player**

- When the music player is playing, press to go to the previous screen, or press to go to the Home screen. The music player stays playing in the background.

**To return to the music player when it is playing in the background**

1. Drag the status bar downwards to open the Notification panel.
2. Tap the track title to open the music player.

- Alternatively, you can press and hold and then tap to return to the music player.

**To delete a track**

1. Open the music player library and browse to the track you want to delete.
2. Touch and hold the track title, then tap Delete.

- You can also delete albums this way.

**To delete one or more tracks at the same time**

1. In the music player, tap .
2. Press .
3. Tap Delete several.
4. Select one or more tracks that you want to delete.
5. Tap Delete.
To share a track
1. When browsing your tracks in the music player library, touch and hold a track title.
2. Tap Send.
3. Select an available transfer method, and follow the on-screen instructions.

💡 You can also share albums and playlists this way.

⚠️ You might not be able to copy, send or transfer copyright-protected items.

To share one or more tracks at the same time
1. When browsing your tracks in the music player library, press ⌘.
2. Tap Send several.
3. Tap one or more tracks that you want to share.
4. Tap Send.
5. Select an available transfer method, and follow the on-screen instructions.

⚠️ You might not be able to copy, send or transfer copyright-protected items.

Music player widget
The music player widget is a miniature application that gives you direct access to the music player from your Home screen. You need to add this widget to your Home screen before you can use it.

To add the music player widget to your Home screen
1. From your Home screen, press ⌘.
2. Tap Add > Widgets.
3. Tap Music player.

Discovering related audio content
In the music player, you can discover audio content that is related to the artist you are listening to by tapping the Infinite button 📢.

You can also search for audio content related to a particular artist while you are browsing the music player. The music player searches for and lists the following types of results:
- Music videos on YouTube™
- Artist info on Wikipedia
- Lyrics on Google
- Karaoke videos on YouTube™
- Extension searches on the web

Playing music in random order
You can play tracks in playlists in random order. A playlist can be, for example, a playlist you have created yourself or an album.

To play tracks in random order
1. In the music player, tap ⫸.
2. Tap 🔄 and navigate to an album, or tap ⫸ and browse to a playlist.
3. Open the album or playlist by tapping its name.
4. Tap 🔄.

💡 You can also tap ⫸ and shuffle all tracks in the list.

Playlists
The music player automatically creates Smart playlists on the playlist tab ⫸ in the music player library. The music player also creates a playlist (called Most played) of
the most played songs of each artist in your audio library. You can create your own playlists from the music on your memory card.

In addition, you can copy playlists from a computer to the memory card if you have the Media Go™ application installed on the computer. When you connect and mount your phone to the computer using a USB cable connection, your memory card appears in the Media Go™ application on the computer. For more information, see Connecting your phone to a computer on page 100.

To play smart playlists
1 In the music player, tap 🎧.
2 Tap 🎧.
3 Under Smart playlists, tap a playlist.
4 Tap a track to play it.

To create your own playlist
1 In the music player, tap 🎧.
2 To add an artist, album or a track to a playlist, touch and hold the name of the artist or the title of the album or track to open a menu.
3 Tap Add to playlist > Create new playlist.
4 Enter a name for the playlist and tap OK. You have now created a playlist and added an artist, an album or a track to that playlist. View your playlists by tapping 🎧 in the music player library.

To add tracks to a playlist
1 When browsing the music player library, touch and hold the name of the artist or the title of the album or track you want to add.
2 Tap Add to playlist.
3 Tap the name of the playlist to which you want to add the artist, album or track. The artist, album or track is added to the playlist.

To play your own playlists
1 In the music player, tap 🎧.
2 Tap 🎧.
3 Under My playlists, tap a playlist.
4 Tap a track to play it.

To remove a track from a playlist
1 In a playlist, touch and hold the title of the track you want to delete.
2 Tap Delete from playlist.

To delete a playlist
1 In the music player, tap 🎧, then select Playlists.
2 Touch and hold the playlist you want to delete.
3 Tap Delete.
4 Tap Delete again to confirm.
Identifying music using TrackID technology

Use the TrackID™ music recognition service to identify a music track you hear playing in your surroundings. Just record a short sample of the song and you’ll get artist, title and album info within seconds. You can purchase tracks identified by TrackID™ and you can view TrackID charts to see what TrackID users around the globe are searching for. For best results, use TrackID™ technology in a quiet area. If you have problems using this application, see I cannot use Internet-based services on page 117.

The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

To open the TrackID™ application
1 From your Home screen, tap 📱.
2 Find and tap TrackID™.

You can also use the TrackID™ widget to open the TrackID™ application.

To search for track information using TrackID™
1 When the TrackID™ application is open, hold the phone towards the music source.
2 Tap Record. If the track is recognised by the TrackID™ service, the results appear on the screen.

To view TrackID™ charts
1 When the TrackID™ application is open, tap the 📊 tab. The first time you view a chart, it is set to your own region.
2 To see charts of the most popular searches in other regions, tap 📊 > Regions.
3 Select a country or region.

Using TrackID™ technology results
Track information appears when the TrackID™ application recognises a track. You can select to purchase the track or share it using email or SMS. You can also get more information about the track’s artist.

To buy a track using TrackID™ technology
1 When the TrackID™ application is open, tap a track title.
2 In the track information screen, tap Download.
3 Follow the instructions in your phone to complete your purchase.

The track purchase feature may not be supported in all countries/regions, or by all networks and/or service providers in all areas.

To share a track using email or SMS
1 When the TrackID™ application is open, tap a track title.
2 Select a sharing method.
3 Follow the instructions in your phone to complete the procedure.

To view the artist information for a track
1 When the TrackID™ application is open, tap a track title.
2 Tap Artist info.
To delete a track from the track history
1 When the TrackID™ application is open, tap a track title.
2 Tap Delete.
3 Tap Yes in the popup window.
Taking photos and recording videos

Take a photo or record a video with the camera in your phone. You can hold the camera horizontally or vertically. Use the front camera to take self-portraits. Share a photo or a video with friends, or upload your photos and videos to a web service. Your camera is equipped with the highly sensitive Exmor R sensor, which enables sharp photos and videos even in low lighting conditions.

Camera controls overview

1. Switch between the front and back camera
2. Take photos or record video clips
3. Go back a step or exit the camera
4. Switch between the still camera, video camera, or panorama camera
5. Settings button – tap to display all settings

Using the camera

To open the camera

• From your Home screen, tap 📸, then find and tap 📸.

To switch between the still, video, and panorama cameras

• In the camera viewfinder, tap 📸, 📺 or 🌆 to switch to the still camera, the video camera or the panorama camera, respectively.

To close the camera

• Press ⌚ from the main camera screen.

Using the still camera

To take a photo

1. Open the camera.
2. If the still camera is not selected, tap the still camera icon 📸 to expand the view, then tap 📸 again to confirm its selection.
3. Point the camera towards the subject.
4. Tap 📸.

To view previously taken photos

• In the camera viewfinder, tap the thumbnails at the top right.
Using still camera settings

To adjust the still camera settings

1. Open the camera.
2. If the still camera is not selected, tap the still camera icon to expand the view, then tap again.
3. To display all settings, tap .
4. Select the setting that you want to adjust, then edit as desired.

Still camera settings

The following settings appear in the camera viewfinder when you tap the settings button .

Scene mode

Use the Scenes feature to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible photo. Select how the camera adjusts colours in different kinds of light, to achieve the most natural looking colours for your photos.

- Auto: The camera automatically adjusts settings for a photo.
- Night: Use when taking photos at night or in poorly lit environments (without the photo light). Due to long exposure time, the camera must be held still or placed on a stable surface.

Camera settings

- Picture size: Set the picture size for the photos you take. A photo with a higher resolution requires more memory.
- Store location: Select if you want the geographical location to be added when you take a photo.
- Focus mode: The focus settings control which part of a photo should be sharp.
- Restore defaults: Restore the camera settings to the default values.

Exposure

Adjust the exposure for the photos you take.

Flash mode

Select how the flash should be used.

- Auto: The camera relies on its light meter to decide whether or not a flash is necessary.
- On: Use the flash.
- Off: Don’t use the flash. Sometimes photo quality can be better without a flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand.

White balance

Select how the camera adjusts colours in different kinds of light, to achieve the most natural looking colours for your photos.

- Auto: Adjust the colour balance automatically to the lighting conditions.
- Incandescent: Adjust the colour balance for bright lighting conditions, such as under light bulbs, or when lighting conditions change quickly.
- Daylight: Adjust the colour balance for bright outdoor use.
Fluorescent: Adjust the colour balance for fluorescent lighting.

Cloudy: Adjust the colour balance for a cloudy sky.

Tips on using the camera

Rule of thirds
Don’t place your subject in the middle of the frame. By placing it a third of the way in, you achieve a better result.

Hold it steady
Avoid blurry photos by holding the camera steady. Try to steady your hand by leaning it against a solid object.

Get closer
By getting as close as possible to your subject, you can fill the camera screen view with your subject.

Consider variety
Think about different angles, and move towards the subject. Take some vertical photos. Try different positions.

Use a plain background
A plain background helps highlight your subject.

Keep your lens clean
Mobile phones are used in all kinds of weather and places, and carried in pockets and bags. This results in the camera lens becoming dirty and covered with fingerprints. Use a soft cloth to clean the lens.

Using the video camera

To record a video
1. Open the camera.
2. If the video camera is not selected, tap the video camera icon to expand the view, then tap again.
3. Tap to start recording.
4. Tap to stop recording.

Shoot your videos in landscape orientation to get the best results.

To view previously recorded videos
- In the camera viewfinder, tap the thumbnail at the top right.

Using video camera settings

To adjust video camera settings
1. Open the camera.
2. If the video camera is not selected, tap the still camera icon to expand the view, then tap again.
3. To display all settings, tap .
4. Select the setting you want, then press to return to the viewfinder.

Video camera settings

The following settings appear in the camera viewfinder when you tap the settings button :
Camera settings

**Store location** Select if you want the geographical location to be added when you take a photo.

**Restore defaults** Restore the camera settings to the default values.

**Flash mode**
Select how the camera light should be used.

- **On** Use the light.
- **Off** Don’t use the camera light. Sometimes video quality can be better without the light, even if lighting conditions are poor.

**White balance**
Select how the camera adjusts colours in different kinds of light, to achieve the most natural looking colours for your videos.

- **Auto** Adjust the colour balance automatically to the lighting conditions.
- **Incandescent** Adjust the colour balance for bright lighting such as under light bulbs, or when lighting conditions change quickly.
- **Daylight** Adjust the colour balance for bright outdoor use.
- **Fluorescent** Adjust the colour balance for fluorescent lighting.
- **Cloudy** Adjust the colour balance for a cloudy sky.

**Video quality**
Select the video quality and maximum length combination appropriate for viewing on a computer or for sharing with others via Messaging or YouTube.

---

**Using panorama mode**

Use the panorama function to take wide-angle, panoramic photos of landscapes and other scenes that can’t be captured using the still camera.

**To take a photo in panorama mode**

1. Open the camera.
2. If the panorama camera is not selected, tap the panorama icon to expand the view, then tap again.
3. Point the camera towards the subject.
4. Tap , then pan the camera from left to right in a steady horizontal movement.
Viewing photos and videos in Gallery

Use Gallery to view photos and play videos that you’ve taken with your phone camera, or to view similar content that you’ve downloaded or copied to the memory card. In Gallery, you can also view photos and videos that you’ve uploaded to an online service, for example, to a Picasa™ web album or to Facebook™.

From Gallery, you can also share your favorite photos and videos with friends by using Bluetooth™ wireless technology, email or messaging. And you can perform basic editing tasks on photos and set them as wallpaper or contact pictures. For more information, see Connecting your phone to a computer on page 100.

To open Gallery and view your albums

1. From your Home screen, tap 
2. Find and tap Xperia™ Gallery. Photos and videos on your memory card, including those you’ve taken with the camera and those you’ve downloaded from the web or other locations, appear in albums.

If the screen orientation does not change automatically when you turn the phone sideways, mark the Auto-rotate screen checkbox under Settings > Display.

Working with albums

You can rearrange your photos and videos within albums as well as move content between albums. You can also upload content from your Gallery albums to online services such as Picasa™ and Facebook™, and you can view content from such online services in Gallery.

To open an album in Gallery

1. From your Home screen, tap 
2. Find and tap Xperia™ Gallery.
3. Tap the album you want to view. The album opens displaying its photo and video content in a chronologically ordered grid. The name of the album appears at the top of the screen.
To view photos and videos in Gallery

1. From your Home screen, tap 
2. Find and tap Xperia™ Gallery.
3. Tap an album. Photos and videos are displayed in a chronologically ordered grid. Videos are indicated by 
4. Tap a photo or video to view it.
5. Flick left to view the next photo or video. Flick right to view the previous photo or video.

💡 If the screen orientation does not change automatically when you turn the phone sideways, mark the Auto-rotate screen checkbox under Settings > Display.

To change how the contents of an album are displayed in Gallery

1. When viewing an album in Gallery, drag the album view switch to the right to view the contents of the album in stacks.
2. Drag the album view switch to the left to view the album contents in a chronological grid.

Working with batches of content in Gallery

You can select several photos or videos in an album and work on them in batches, for example, to send a few photos from an album to a friend.

To work with batches of photos or videos in Gallery

1. From your Home screen, tap 
2. Find and tap Xperia™ Gallery.
3. Open the album containing the content that you want to work with.
4. To activate selection mode, touch and hold one of the items that you want to work with.
5. Check or uncheck the items that you want to work with.
6. Press , then use the tools in the toolbar to to work with your selected items.
To share an album in Gallery

- If you share an album, do not delete the original copy of the album before the items in the album are completely sent.

1. From the main Gallery screen, touch and hold an album that you want to work with. Selection mode is now activated.
2. Check the albums you want to share, then press 📇.
3. Tap Share.
4. In the menu that opens, tap the application that you want to use to share the selected albums.

To delete an album in Gallery

1. From the main Gallery screen, touch and hold an album that you want to work with. Selection mode is now activated.
2. Check the albums that you want to delete, then press 📇.
3. Tap Delete. In the dialog that opens, tap Delete again.

Working with photos in Gallery

You can edit and reorganise your photos in Gallery. For example, you can crop photos, use them as contact pictures and as wallpaper.

To zoom a photo

- When you are viewing a photo, double-tap the screen to zoom in. Double-tap again to zoom out.
- When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

To watch a slideshow of your photos

1. From your Home screen, tap ☂️.
2. Find and tap Xperia™ Gallery.
3. Tap an album to open it, then tap a photo and press 📇.
4. In the toolbar at the bottom of the screen, tap Slideshow.
5. Tap a photo to end the slideshow.

To rotate a photo

1. When you are viewing a photo, press 📇.
2. Tap More, then select Rotate Left or Rotate Right. The photo is saved in the new orientation.

To use a photo as a contact picture

1. When you are viewing a photo in the photo viewer, press 📇.
2. In the toolbar at the bottom of the screen, tap Set as > Contact picture.
3. Select the contact you want to associate with the photo.
4. Crop the photo, if required.
5. Tap Save.

To use a photo as wallpaper

1. When you are viewing a photo in the photo viewer, press 📇.
2. In the toolbar at the bottom of the screen, tap Set as > Wallpaper.
3. Crop the photo, if required.
4. Tap Save.
To crop a photo

1. When you are viewing a photo in the photo viewer, press .
2. In the toolbar, tap More > Crop.
3. To adjust the crop frame, touch and hold the edge of the crop frame. When crop arrows appear, drag inward or outward to resize the frame.
4. To resize all sides of the crop frame at the same time, touch and hold one of the four corners to make the arrows appear, then drag the corner accordingly.
5. To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
6. To save a copy of the photo as you cropped it, tap Save. The original uncropped version remains on your phone’s memory card.

To share a photo

1. When you are viewing a photo in the photo viewer, press .
2. In the toolbar, tap Share.
3. Select one of the available transfer methods.

To delete a photo

1. When you are viewing a photo in the photo viewer, press .
2. In the toolbar at the bottom of the screen, tap Delete.
3. In the dialog that opens, tap Delete.

Viewing your photos on a map

If you enable location detection when taking photos, you can use the information gathered at a later stage. For example, you can view your photos on a map and show friends and family where you were when you took the photo. Adding location information is also referred to as geotagging. When you enable location detection, you can select to use either GPS satellites or wireless networks, or both, to find your position.

For more information, see Using location services to find your position on page 103.

To enable location detection

1. From your Home screen, press .
2. Tap Settings > Location services.
3. Mark the GPS satellites and/or Google’s location service checkboxes.

To view geotagged photos on a map

1. When you are viewing a photo that you have geotagged, press .
2. Tap More > Show on map.

Working with videos

Use Gallery to watch videos that you’ve taken with the camera, downloaded, or copied to your memory card. You can also share your videos with friends, or upload them to YouTube™.

To play a video

1. In Gallery, browse to the album containing the video that you want to play.
2. Tap the video to play it.
3. If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.

To pause a video

1. When a video is playing, tap the screen to display the controls.
2. Tap .
To fast forward and rewind a video
1 When a video is playing, tap the screen to display the controls.
2 Drag the progress bar marker left to rewind, or right to fast forward.
💡 Alternatively, you can tap ⏯️ or ⏯️.

To adjust the volume of a video
• Press the volume key.

To share a video
1 Open a Gallery album containing a video.
2 To activate selection mode, touch and hold an item that you want to work with.
3 Check the video or videos that you want to share.
4 Press ..., then tap Share.
5 In the menu that opens, tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

⚠️ You might not be able to copy, send or transfer copyright-protected items. Also, some items may not send if the file size is too large.

To delete a video
1 Open a Gallery album containing a video.
2 To activate selection mode, touch and hold an item that you want to work with.
3 Check the video or videos that you want to delete.
4 Press ..., then tap Delete.
5 In the dialog that opens, tap Delete.
Bluetooth™ wireless technology

Use the Bluetooth™ function to send files to other Bluetooth™ compatible devices, or to connect to handsfree accessories. Turn on the Bluetooth™ function in your phone and create wireless connections to other Bluetooth™ compatible devices such as computers, handsfree accessories, and phones. Bluetooth™ connections work better within a 10 meter (33 foot) range, with no solid objects in between.

Interoperability and compatibility among Bluetooth™ devices can vary.

To turn on the Bluetooth™ function and make your phone visible
1. From your Home screen, tap 📱.
2. Find and tap Settings.
3. Tap OFF beside Bluetooth so that OFF changes to ON. 📱 appears in the status bar.
4. Tap Bluetooth.
5. Tap Not visible to other Bluetooth devices.

To adjust your phone’s visibility time to other Bluetooth™ devices
1. From your Home screen, tap 📱.
2. Find and tap Settings > Bluetooth.
3. Press ⏱ and select Visibility timeout.
4. Select an option.

Naming your phone
You can give your phone a name. This name is shown to other devices after you have turned on the Bluetooth™ function and your phone is set to visible.

To give your phone a name
1. Make sure that the Bluetooth™ function is turned on.
2. From your Home screen, tap 📱.
3. Find and tap Settings > Bluetooth.
4. Press ⏱ and select Rename phone.
5. Enter a name for your phone.
6. Tap Rename.

Pairing with another Bluetooth™ device
When you pair your phone with another device, you can, for example, connect your phone to a Bluetooth™ headset or a Bluetooth™ car kit and use these devices to make and receive calls.

Once you have paired your phone with a Bluetooth™ device the phone will remember this pairing. When pairing the phone with a Bluetooth™ device, you may need to enter a passcode. Your phone will automatically try the generic passcode 0000. If this does not work, refer to your Bluetooth™ device documentation for the device passcode. You do not need to re-enter the passcode the next time you connect to a paired Bluetooth™ device.

Some Bluetooth™ devices, for example, most Bluetooth™ headsets, require you to both pair and connect with the other device.

You can pair your phone with several Bluetooth™ devices, but you can only connect to one Bluetooth™ profile at the same time.
To pair your phone with another Bluetooth™ device
1 Make sure that the device you want to pair your phone with has the Bluetooth™ function activated and is visible to other Bluetooth™ devices.
2 From the Home screen, tap 📱.
3 Find and tap Settings > Bluetooth. All available Bluetooth™ devices appear in a list.
4 Tap the Bluetooth™ device that you want to pair with your phone.
5 Enter a passcode, if required. The phone and the Bluetooth™ device are now paired.

To connect your phone to another Bluetooth™ device
1 If you are connecting to a Bluetooth device that requires you to first pair your phone before connecting, follow the relevant steps to pair your phone with that device.
2 From your Home screen, tap 📱.
3 Find and tap Settings > Bluetooth.
4 Tap the Bluetooth™ device to which you want to connect your phone.

To unpair a Bluetooth™ device
1 From the Home screen, tap 📱.
2 Find and tap Settings > Bluetooth.
3 Under Paired devices, tap 📱 beside the name of the device that you want to unpair.
4 Tap Unpair.

Sending and receiving items using Bluetooth™ technology
Share items with other Bluetooth™ compatible devices such as phones or computers. You can send and receive several kinds of items using the Bluetooth™ function, such as:
- Photos and videos
- Music and other audio files
- Contacts
- Web pages

To send items using Bluetooth™
1 Receiving device: Make sure the Bluetooth™ device that you want to send the item to has Bluetooth™ turned on and is visible to other Bluetooth™ devices.
2 In the sending device, open the application which contains the item you want to send and scroll to the item.
3 Depending on the application and the item you want to send, you may need to, for example, touch and hold the item, open the item or press 📱. Other ways to send an item may exist.
4 Select a share or send menu item.
5 In the menu that appears, select Bluetooth.
6 Turn on Bluetooth™, if you are asked to do so.
7 Tap the name of the receiving device.
8 Receiving device: If asked, accept the connection.
9 If asked, enter the same passcode on both devices, or confirm the suggested passcode.
10 Receiving device: Accept the incoming item.
To receive items using Bluetooth™

1 Make sure there is a memory card in your phone. If you don’t have a memory card inserted, you cannot send or receive items using Bluetooth wireless technology.
2 From your Home screen, tap 🔍.
3 Make sure that the Bluetooth™ function is on and is visible to other Bluetooth™ devices.
4 The sending device now starts sending data to your phone.
5 If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
6 When you are notified of an incoming file to your phone, drag the status bar downwards and tap the notification to accept the file transfer.
7 Tap Accept to start the file transfer.
8 To view the progress of the transfer, drag the status bar downwards.
9 To open a received item, drag the status bar downwards and tap the relevant notification.

To view files you have received using Bluetooth™

1 From your Home screen, tap 🔍.
2 Find and tap Settings > Bluetooth.
3 Press ⌁ and select Show received files.
Connecting your phone to a computer

Connect your phone to a computer and start transferring pictures, music and other file types. The easiest ways to connect are using a USB cable or Bluetooth wireless technology.

When you connect your phone to the computer using a USB cable, you are prompted to install the PC Companion application on your computer. PC Companion helps you access additional computer applications to transfer and organise media files, update your phone, synchronise phone content, and more.

⚠️ You might not be able to transfer some copyright-protected material between your phone and computer.

Transferring and handling content using a USB cable

Use a USB cable connection between a computer and your phone for easy transfer and management of your files. Once the two devices are connected, you can drag and drop content between them using the computer’s file explorer. If you’re transferring music, video, pictures or other media files to your phone, it’s best to use the Media Go™ application on your computer. Media Go™ converts media files so that you can use them on your phone.

To transfer content between a phone and computer using a USB cable

1. Using a USB cable, connect your phone to a computer. SD card connected appears in the status bar.
2. Computer: Open Microsoft® Windows® Explorer from the desktop and wait until your phone’s SD card appears as an external disk in Microsoft® Windows® Explorer.
3. Computer: Drag and drop the desired files between your phone and the computer.

Transferring files using Media transfer mode via Wi-Fi®

You can transfer files between your phone and other MTP compatible devices, such as a computer, using a Wi-Fi® connection. Before connecting, you first need to pair the two devices. If you’re transferring music, video, pictures or other media files between your phone and a computer, it’s best to use the Media Go™ application on the computer. Media Go™ converts media files so that you can use them on your phone.

💡 In order to use this feature, you need a Wi-Fi® enabled device that supports Media transfer, for example, a computer running Microsoft® Windows Vista® or Windows® 7.

To pair your phone wirelessly with a computer using Media transfer mode

1. Make sure Media transfer mode is enabled on your phone. It is normally enabled by default.
2. Connect your phone to the computer using a USB cable.
3. Computer: Once the phone name appears on the screen, click Network configuration and follow the instructions to pair the computer.
4. When you are finished pairing, disconnect the USB cable from both devices.

⚠️ The above instructions only work if Windows® 7 is installed on your computer and the computer is connected to a Wi-Fi® Access Point via a network cable.
To connect paired devices wirelessly in Media transfer mode
1. Make sure Media transfer mode is enabled on your phone. It is normally enabled by default.
2. From your Home screen, tap ☰.
3. Find and tap Settings > Xperia™ > Connectivity.
4. Tap the paired device that you want to connect to under Trusted devices.
5. Tap Connect.

! Make sure your phone’s Wi-Fi® function is turned on.

To disconnect a wirelessly paired device in Media transfer mode
1. From your Home screen, tap ☰.
2. Find and tap Settings > Xperia™ > Connectivity.
3. Tap the paired device that you want to disconnect from under Trusted devices.
4. Tap Disconnect.

To remove a pairing with another device
1. From your Home screen, tap ☰.
2. Find and tap Settings > Xperia™ > Connectivity.
3. Tap the paired device that you want to remove.
4. Tap Forget.

PC Companion
PC Companion is a computer application that gives you access to additional features and services which help you transfer music, video and pictures to and from your phone. You can also use PC Companion to update your phone and get the latest software version available. The installation files for PC Companion are saved on your phone and the installation is launched from the phone when you connect it to a computer via USB cable.

You need a computer running one of the following operating systems to use the PC Companion application:
• Microsoft® Windows® 7
• Microsoft® Windows Vista®
• Microsoft® Windows® XP (Service Pack 3 or higher)

To install PC Companion
1. New phone: Turn on your new Android™ phone and connect it to a PC using a USB cable.
2. New phone: Tap Install to install PC Companion on the PC.
3. Computer: If a popup window appears, select Run Startme.exe. In the new popup window that appears, click Install to start the installation and then follow the instructions to complete the installation.

To start PC Companion
1. Make sure that PC Companion is installed on your PC.
2. Open the PC Companion application on the PC, then click Start to open one of the features that you want to use.

Media Go™
The Media Go™ computer application helps you transfer and manage media content in your phone and computer. You can install and access Media Go™ from within the PC Companion application. See PC Companion on page 101 for more information.

You need one of these operating systems to use the Media Go™ application:
• Microsoft® Windows® 7
• Microsoft® Windows Vista®
• Microsoft® Windows® XP, Service Pack 3 or higher
To transfer content using the Media Go™ application

1. Connect your phone to a computer using a supported USB cable.
2. **Phone**: In the status bar, **SD card connected** appears.
3. **Computer**: The PC Companion application launches automatically. In PC Companion, click **Media Go** to start the Media Go™ application. In some cases, you may have to wait for Media Go™ to install.
4. Using Media Go™, drag and drop files between your computer and phone.

* Media Go™ can also be downloaded from [www.sonymobile.com](http://www.sonymobile.com).
Using location services to find your position

Use your phone to find out where you are. There are two methods: GPS and wireless networks. Enable the wireless networks option if you only need your approximate location, and want it fast. If you want a more exact position, and have a clear view of the sky, enable the GPS option. In situations where the wireless network connection is weak, you should enable both options to ensure that your location is found.

⚠ Sony does not warrant the accuracy of any location services including but not limited to navigational services.

To enable GPS
1. From your Home screen, tap 📱.
2. Tap Settings > Location services.
3. Mark the GPS satellites checkbox.

Using GPS
Your phone has a global positioning system (GPS) receiver that uses satellite signals to calculate your location.

⚠ When you use features that require the GPS receiver to find your location, make sure you have a clear view of the sky.

Getting the best performance
The first time you use the GPS it can take 5 to 10 minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don’t cover the GPS antenna (the highlighted area in the image). The GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn’t found after a few minutes, move to another location.

Google Maps™
Track your current location, view real-time traffic situations and receive detailed directions to your destination. Before taking trips, you can download and save maps to your memory card to avoid high roaming costs.

⚠ The Google Maps™ application requires the use of an Internet connection. You may incur data connection charges when you connect to the Internet from your phone. Contact your network operator for more information. The Google Maps™ application may not be available in every market, country or region.
To use Google Maps™
1. From your Home screen, tap 🔍.
2. Find and tap Maps.

If you want to use Google Maps™, you have to enable one of the location methods available under Settings > Location services.

To learn more about Google Maps™
• When you use Google Maps™, press 🔄, then tap Help.

Viewing your friends' locations with Google Latitude™
Join Google Latitude™ to view your friends’ locations on maps and share your location and other information with them.

Using Google Maps™ to get directions
Use the Google Maps™ application to get directions when you travel by foot, public transportation, or car. You can add a shortcut to a destination on your Home screen to get quick directions from wherever you are.

When you view a map, you make an Internet connection, and data is transferred to your phone. So it’s a good idea to download and save maps to your phone before you take a trip. This way, you can avoid high roaming costs.

Sony does not warrant the accuracy of any directional services.

Using the Navigation application
Use the Navigation application in your phone to get turn-by-turn instructions on how to get places. The directions are both spoken and displayed on the screen.

The Navigation application may not be available in every market.

To start Navigation
1. From your Home screen, tap 🔍.
2. Find and tap Navigation.

Using the Wisepilot™ application
Get turn-by-turn voice instructions on how to get places. You can also manage your trips and share routes and locations with friends via SMS, Twitter™ or Facebook™.

Wisepilot™ may not be available in every market. For more information, including a Wisepilot User manual, go to www.sonymobile.com.

To start Wisepilot™
1. From the Home screen, tap 🔍.
2. Find and tap Wisepilot.
Back up and restore application to make backups of phone content to your memory card or online storage account. Such backups can be used to restore your content and some phone settings in cases where your data gets lost or deleted.

**Types of content you can back up**

Use the Backup and restore application to back up the following types of data:

- Bookmarks
- Call log
- Contacts
- Applications from Google Play™
- Multimedia messages
- System settings (such as alarms, ringer volume)
- Text messages

⚠️ You do not need to back up music files and photos or videos taken with the phone camera. They are backed up automatically to the phone’s memory card.

⚠️ You may incur additional data transmission charges when you restore Google Play™ applications.
Locking and protecting your phone

IMEI number
Every phone has a unique IMEI (International Mobile Equipment Identity) number. You should keep a copy of this number. If your phone is stolen, your network provider can use your IMEI number to stop the phone from accessing the network in your country.

To view your IMEI number

1. Turn off your phone, then remove the battery cover and battery.
2. Look for the 15- to 17-digit number on the label. The first 15 digits represent the IMEI number.

To view your IMEI number in the phone

1. From your Home screen, tap .
2. Find and tap Settings > About phone > Status.
3. Scroll to IMEI to view the IMEI number.

SIM card protection
The SIM card lock only protects your subscription. Your phone will still work with a new SIM card. If the SIM card lock is on, you have to enter a PIN (Personal Identity Number). If you enter your PIN incorrectly more times than the maximum number of attempts allowed, your SIM card will become blocked. You need to enter your PUK (Personal Unblocking Key) and then a new PIN. Your PIN, PIN2 and PUK are supplied by your network operator.

To enable the SIM card PIN lock

1. From the Home screen, tap .
2. Find and tap Settings > Security > Set up SIM card lock > Lock SIM card.
3. Enter the SIM card PIN and tap OK.

To change the SIM card PIN

1. From the Home screen, tap .
2. Find and tap Settings > Security > Set up SIM card lock > Change SIM PIN.
3. Enter the old SIM card PIN and tap OK.
4. Enter the new SIM card PIN and tap OK.
5. Re-type the new SIM card PIN and tap OK.
To change the SIM card PIN2
1 From the Home screen, tap 📱.
2 Find and tap Settings > Call settings > Fixed dialling numbers > Change PIN2.
3 Enter the old SIM card PIN2 and tap OK.
4 Enter the new SIM card PIN2 and tap OK.
5 Confirm the new PIN2 and tap OK.

To unblock a locked SIM card
1 When Enter PUK and new PIN code appears, enter the PUK code.
2 Enter a new PIN code and tap OK.
⚠️ If you enter an incorrect PUK code too many times, the SIM card becomes blocked. If this happens, contact your service provider to get a new SIM card.

Setting a screen lock

To set a screen lock
1 From your Home screen, tap 📱 > Settings > Security > Screen lock.
2 Select an option.
⚠️ It is very important that you remember your screen unlock pattern, PIN or password. If you forget this information, it may not be possible to restore important data such as contacts and messages. Refer to Sony Customer support for more information.

To set up the Face Unlock protection
1 From your Home screen, tap 📱 > Settings > Security > Screen lock.
2 Tap Face Unlock, then follow the instructions in your phone to capture your face.
3 After your face is successfully captured, set up screen lock Pattern or PIN as a backup method to unlock the screen. For more information, refer to 'To create a screen unlock pattern' or 'To create a screen unlock PIN'.
⚠️ The Face Unlock feature is less secure than a screen lock pattern, PIN, or password. Someone who looks similar to you could unlock your phone.

💡 For best results, capture your face in an indoor area that is well lit but not too bright and hold the phone at eye level.

To unlock the screen using the Face Unlock feature
1 Activate the screen.
2 Look at your phone from the same angle you used to capture your Face Unlock photo.

⚠️ If Face Unlock fails to recognise your face, you need to draw the backup pattern or PIN to unlock the screen.

To disable the Face Unlock protection
1 From your Home screen, tap 📱 > Settings > Security > Screen lock.
2 Draw your backup screen unlock pattern or enter your PIN.
3 Tap Slide.

To create a screen unlock pattern
1 From the Home screen, tap 📱.
2 Find and tap Settings > Security > Screen lock > Pattern.
3 Follow the instructions in your phone. You are asked to select a security question that will be used to unlock the phone if you forget your screen unlock pattern.
To unlock the screen using a screen unlock pattern
1. Activate the screen.
2. Draw your screen unlock pattern.

⚠️ If the unlock pattern you draw on the screen is rejected five times in a row, you can select to either wait 30 seconds and then try again, or to answer the security question you have selected.

To change the screen unlock pattern
1. From your Home screen, tap 📱.
2. Find and tap Settings > Security > Screen lock.
3. Draw your screen unlock pattern.
4. Tap Pattern.
5. Follow the instructions in your phone.

To disable the screen unlock pattern
1. From your Home screen, tap 📱 > Settings > Security > Screen lock.
2. Draw the screen unlock pattern.
3. Tap Slide.

To create a screen unlock PIN
1. From your Home screen, tap 📱 > Settings > Security > Screen lock > PIN.
2. Enter a numeric PIN.
3. If necessary, tap 📡 to minimise the keyboard.
4. Tap Continue.
5. Re-enter and confirm your PIN.
6. If necessary, tap 📡 to minimise the keyboard.
7. Tap OK.

To disable the screen unlock PIN
1. From your Home screen, tap 📱 > Settings > Security > Screen lock.
2. Enter your PIN, then tap Next.
3. Tap Slide.

To create a screen lock password
1. From your Home screen, tap 📱 > Settings > Security > Screen lock > Password.
2. Enter a password.
3. If necessary, tap 📡 to minimise the keyboard.
4. Tap Continue.
5. Re-enter and confirm your password.
6. If necessary, tap 📡 to minimise the keyboard.
7. Tap OK.

To disable the screen unlock password
1. From your Home screen, tap 📱 > Settings > Security > Screen lock.
2. Enter your password and tap Next.
3. Tap Slide.
Updating your phone

Update your phone to the most recent software version to get optimal performance and the latest enhancements.

You can use the Update center application on your phone to run a wireless update or you can use the PC Companion application on a computer to run an update using a USB cable connection. If you update wirelessly, then you can use either a mobile network or a Wi-Fi® network connection. Just make sure you back up and save all data stored on your phone before you update.

⚠️ When you run an update using the Update center application, a data connection is established and related charges may be incurred. Also, the availability of updates over a mobile network depends on your operator. Contact your network operator for more information.

Updating your phone wirelessly

Use the Update center application to update your phone wirelessly. You can download software updates manually, or you can allow Update service to update your phone automatically whenever downloads become available. When the automatic update feature is activated, a notification appears in the status bar every time an update becomes available.

To download software updates manually from Update center
1. From your Home screen, tap  
2. Find and tap Update Centre.
3. Select the desired application or system update and tap Download, or tap Update all to download all application updates.

⚠️ Application updates launch automatically after download. With system updates, wait for your phone to restart, then install the update manually. Also, You may incur data connection charges when downloading updates over 3G/mobile networks.

To activate automatic software updates from Update center
1. From your Home screen, tap  
2. Find and tap Update Centre.
3. Press ☰ then tap Settings.
4. Tap Allow automatic update: and select whether to download updates via 3G and Wi-Fi® networks, or via Wi-Fi® networks only. Updates are now downloaded automatically as soon as they become available.

⚠️ You may incur data connection charges when downloading updates over 3G/mobile networks.

To install system updates
1. From your Home screen, tap  
2. Find and tap Update Centre.
3. Select a system update you want to install, then tap Install.

Updating your phone using a USB cable connection

Some updates are not available for wireless download. Notifications appear in the status bar to inform you of such updates. To download and run the updates, you need a USB cable and a computer running the PC Companion application. You can install PC Companion on the computer using installation files saved on your phone, or you can download the application directly from www.sonymobile.com.
To download the PC Companion application from your phone
1 Connect your phone to a computer using a USB cable.
2 When prompted, follow the instructions in the phone to launch the installation of PC Companion on the computer.

💡 PC Companion can also be downloaded from www.sonymobile.com.

To download software updates using a USB cable connection
1 Install the PC Companion application on the computer you are using, if it is not already installed.
2 Connect your phone to the computer using a USB cable.
3 **Computer:** Launch the PC Companion application. After a few moments, PC Companion detects your phone and searches for new phone software.
4 **Phone:** When notifications appear in the status bar, follow the on-screen instructions to carry out the relevant software updates.

To update your phone using an Apple® Mac® computer
1 Install the Bridge for Mac application on the Apple® Mac® computer you are using, if it is not already installed.
2 Using a USB cable, connect your phone to the Apple® Mac® computer.
3 **Computer:** Launch the Bridge for Mac application. After a few moments, Bridge for Mac detects your phone and searches for new phone software.
4 **Computer:** If a new phone software update is detected, a popup window appears. Follow the on-screen instructions to carry out the relevant software updates.

⚠️ The Bridge for Mac application is downloadable from www.sonymobile.com.

User support

Access user support directly in your phone through the Help application. For example, you can open a User guide with instructions on how to use your phone. You can also get troubleshooting and other help from the Sony Mobile support zone, and from the Sony Mobile Customer support service.

- Help application features:
  - User guide in the phone – read and search information on how to use your phone.
  - Educate yourself – read tips and tricks, get the latest news, and watch how-to videos.
  - Email support – send an email to our support team.
  - Support zone – visit www.sonymobile.com to get comprehensive support for your phone.
  - Troubleshooting – find common problems and error messages at the end of our User guides and on the support zone.
  - Customer support – if all else fails. The relevant support numbers are listed in the supplied Important information leaflet.

! An extended User guide is also available at www.sonymobile.com.

To access the Help application

1. From your Application screen, find and tap  
2. Find and tap the required support item.
Troubleshooting

My phone is not working as expected
If you experience problems with your phone, check these tips before you try anything else:

• Restart your phone.
• Remove and re-insert the battery and SIM card. Then restart your phone.
• Update your phone. Updating your phone ensures optimal performance and provides the latest enhancements. See Updating your phone on page 109 for more information.
• Reset your phone.

⚠️ Be patient while resetting your phone. Restarting the phone during a reset procedure may damage the phone permanently.

Resetting the phone
You can reset your phone to its original settings, with or without deleting all of your personal data. It is possible to reset the phone to the state it was in before you first turned it on. But before you perform a reset, make sure to back up any important data saved on your phone.

To reset the phone
⚠️ To avoid permanent phone damage, do not restart the phone while a reset procedure is underway.

1 From your Home screen, tap 🔋.
2 Find and tap Settings > Backup & reset.
3 Tap Factory data reset.
4 To erase not only internal storage but also other user data such as pictures and music, mark the Erase SD card checkbox.
5 Tap Reset phone.
6 To confirm, tap Erase everything.

I cannot charge the phone
The charger is not properly connected or the battery connection is poor. Remove the battery and clean the connectors.

No battery charging icon appears when phone starts charging
It may take a few minutes before the battery icon appears on the screen.

The battery performance is low
Follow our smart tips on how to get more out of your battery. See Improving battery performance on page 15.

I cannot transfer content between my phone and the computer, when using a USB cable
The software or the USB drivers have not been properly installed. Go to www.sonymobile.com for more detailed installation instructions and troubleshooting sections.
I cannot use Internet-based services

Make sure your subscription covers data downloads and that the Internet settings in your phone are correct. See Internet and messaging settings on page 31 for more information on how to enable data traffic, data roaming, and download Internet settings. Contact your network operator for more information about your subscription settings.

Error messages

No network coverage

- Your phone is in Airplane mode. Make sure Airplane mode is turned off.
- Your phone is not receiving any network signal, or the received signal is too weak. Contact your network operator and make sure that the network has coverage where you are.
- The SIM card is not working properly. Insert your SIM card in another phone. If this works, it is probably your phone that is causing the problem. In this case, contact the nearest Sony service center.

Emergency calls only

You are within range of a network, but you are not allowed to use it. However, in an emergency, some network operators allow you to call the international emergency number 112. See Emergency calls on page 34 for more information.

SIM card locked

You have entered your PIN incorrectly 3 times in a row. To unlock the phone, you need the PUK provided by your operator.

SIM card is PUK locked

You have entered your PUK (Personal Unblocking Key) incorrectly 10 times in a row. Please contact your service provider.
Recycling your phone

Got an old phone lying around the house? Why not recycle it? By doing so, you will help us reuse its materials and components, and you’ll protect the environment, too! Find out more about the recycling options in your region at www.sonymobile.com.
